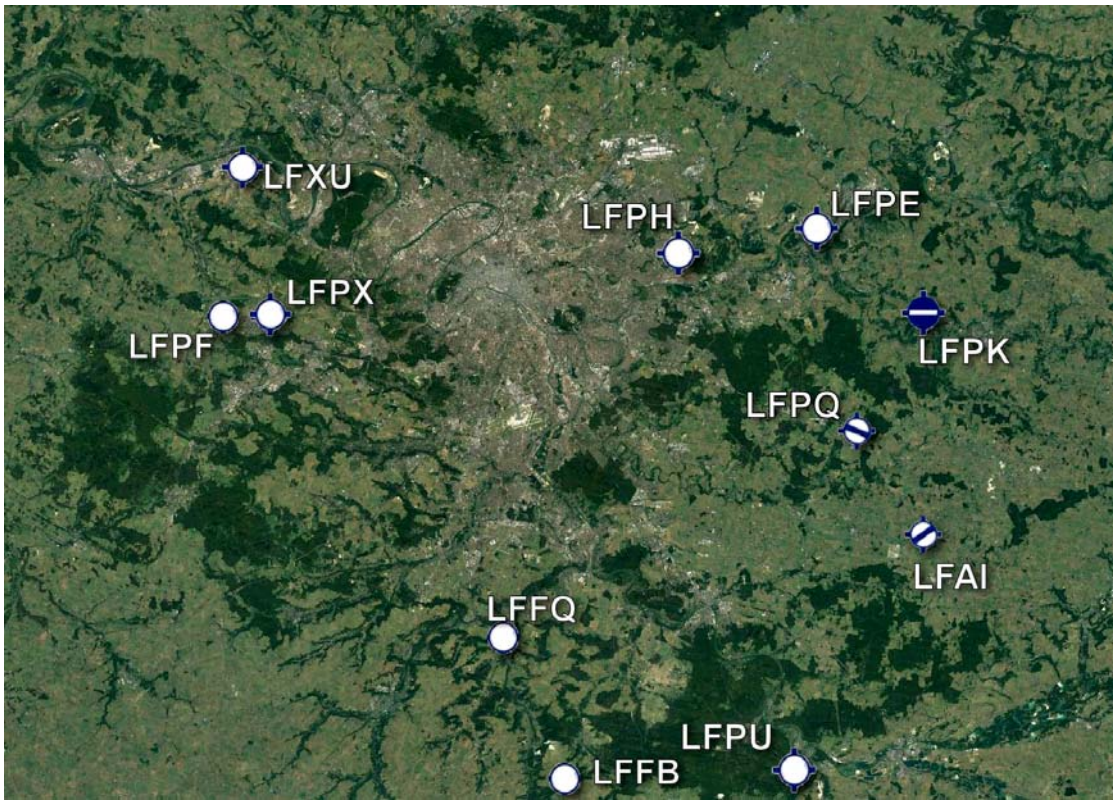
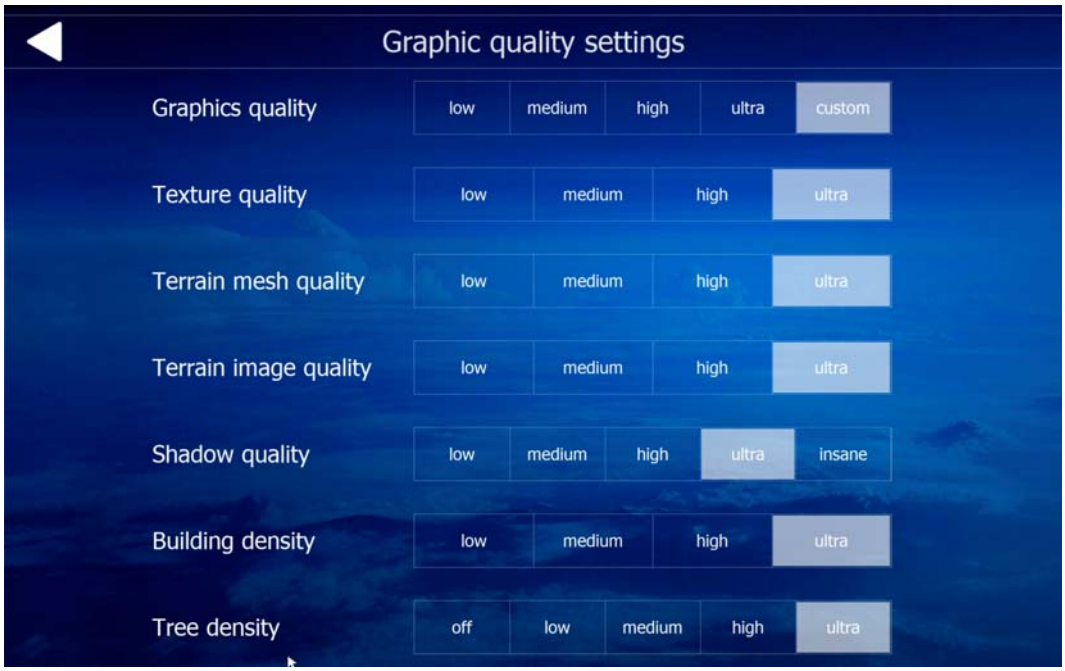
SCENERY COVERAGE



SETTINGS

The graphics engine of Aerofly FS 2 being extremely powerful you can adopt very high graphics settings (subject to sufficient hardware configuration).

NOTE : The center of Paris being extremely dense it is advisable to carry out a minimum of adjustment tests in order to find the best compromise between quality and performance.



CHARTS AND FLIGHT DOCUMENTATION

All the maps and SIA-DIRCAM / DIA documentation of the scenery airports are located in the "\documentation" sub-directory of the directory selected during the product installation process.
