This is a short experience of a virtual gallery highlighting the work of 5 artists in a sensory experience rather than a descriptive one. It was shown over 5 days at the London Art Fair 2018.

NOTE - Audio is an important part of this experience so please use headphones or the audiostrap.

Keys

SPACE = centre view
R = reset simulation
PAUSE = pause simulation

Important
Please use the seated/standing play space (no chaperone) or better disable it through the steamvr config as below:

To disable chaperone:
1. Go to \Steam\config
2. Open steamvr.vrsettings with Notepad
3. Change this line to: "CollisionBoundsColorGammaA" : 0,
4. Save

GammA is the alpha transparency channel so you're setting it to 100% transparent, aka invisible :)

Enjoy!
