How to play:

Brains over brawn is the focus of the game. Your enemy will always pursue you, and you will need to figure out how to stay one step ahead of the curve. Throughout the game you will be prompted with helpful text and you will come across notes that can give you clues on where to go next or what to do if you are stuck. Open world, the game has multiple endings depending on how you play. Best of luck!

Tips:

-Tight spaces. You can fit through tight spaces, anything smaller than a door. *Farberto* can not. This will allow you to quickly escape or find shelter in areas that he can not reach.

-Fire is your friend. You will be safe around open flame, such as a campsite or fireplace. Note that small flames, like wall torches or your lighter, will not be enough to scare off *Farberto*.

-Red Candles will mark areas that you need to investigate.
