Clans to Kingdoms Manual

(in English only – nur auf Englisch – seulement en Anglais – solo en Ingles – apenas em Inglês)

When you start the game the main game menu is displayed as shown in the next image.

From this menu you can start playing the game, learn how to play and configure the game settings.

Setting in-game Language

There are 5 in-game languages to choose from: English, German, French, Spanish and Portuguese. To change the language click the up/down arrows to the right of the button 'Language' (bottom left of the start menu).

Tutorials - Learnig How To Play

To learn how to play Clans to Kingdoms there are 6 in-game tutorials. To access these tutorials click the button 'Tutorials' (center right of the start menu). For further details and videos for the tutorials with related gameplay please read the following guide (click the text, internet is required):

Tutorials (Steam Guide)

Start Playing

To start playing a game you just need to click the button 'Play' (on the left top of the start menu). The game settings will correspond to the last settings saved, the default is a random game.

Load Saved Games

To load save games click the button 'Load' (2nd button from the left top of the start menu). When no saved games exist this button is disabled.

New Game Settings

Before starting a new game you can set the map parameters and game rules including difficulty and victory conditions by clicking the button 'Game Settings' (3rd button from the left top of the start menu). For further details please read the following guide (click the text, internet is required):

New Game Settings (Steam Guide)

Multiplayer Games

To host a network game click the button 'Host Multiplayer' (right top of the start menu) and to join a multiplayer game click the button 'Join Multiplayer' (2nd button from the right top of the start menu). When no network is detected both the host and join multiplay buttons are disabled. For further details please read the following guide which contains a demonstration video (click the text, internet is required):

Starting Multiplayer Games and in-game Cooperation/Competition (Steam Guide)

Sound Settings

To access the sound and music settings for the game click the button 'Sound Settings' (4th button from the left top of the start menu). For further details please read the following guide (click the text, internet is required):

Sound Settings (Steam Guide)

Graphics Settings

To access the graphics settings for the game click the button 'Graphics Settings' (5th button from the left top of the start menu). For further details please read the following guide (click the text, internet is required):

Graphics Settings (Steam Guide)

Control Settings

To access the control settings for the game click the button 'Control Settings' (6th button from the left top of the start menu). For further details please read the following guide (click the text, internet is required):

Control Settings (Steam Guide)

Language Modification Tools

You can change the game text fonts and all the in-game text or download existing mods form the Steam Workshop. The Language mod tools templates are in a zip file in the '(install directory)\Mods\CTK_ModTemplates.zip'. For further details please read the following guide (click the text, internet is required):

Workshop Guide (Language Mods) (Steam Guide)

Frequently Asked Questions (FAQs)

The frequently asked questions are compiled in the following guide (click the text, internet is required):
