HALLOWEEN NIGHT

instruction

Chapter 1

To survive the first chapter, you must understand the mechanics of the game.

The Devil moves very fast so there is no time to stop. You have to turn around all the time and go to the door to see where the Devil is and to chase him away.

Left door:
- If you stand by the door and it's closed, it means that the Devil is not there.

- If the door is slightly open, it means that he has opened it and wants to come into your room. You must then close the door with the "control" key.

- If the door is slightly open and you can see the Devil himself, you must close the door quickly!

- If the door is wide open, you are late. There is nothing left for you to do but wait for death.

Closet:
- If you shine a flashlight on the wardrobe door and it closes immediately, it means that you managed to scare the Devil away from you. Congratulations!

- On the other hand, if you turn on the flashlight and the closet is open, it means that the Devil is about to get you.

Balcony:
- If you see the Devil behind the CLOSED balcony door, you must immediately use the flashlight and spam it as many times until the Devil is gone. He doesn't like light, it scares him off.
- If, while looking at the balcony, you see an open door and a Devil waiting for you, you must run to the balcony door as quickly as possible and close it using the "C" key.
If you close the door, he will still be standing there, repeat the action described above, i.e. use the flashlight to scare him away.

The window behind you:
- If the window is slightly ajar and you see the Devil behind it, quickly close the window (using the "C" key) and the Devil will leave.
- If the window is wide open and the Devil is reaching for you with his hands, close the window as soon as possible!
- There is one more moment when the Devil will attack you. Chapter 1 takes place at night, a very dark night, so some things are hard to see or not at all. If the window is wide open and you cannot see the Devil, it means that you will die in a moment.

Now with this knowledge, you can face the Devil and survive the first chapter!

But ... this is just the beginning, Halloween is not yet to come in the second chapter. Get ready for terror.
