This is a 2D ACT game, and your target is let one NPC drop on another NPC. You can collide and drag one NPC to let it touch another then you win a level. You also need Jump very well in this game. This game is also a fitness game, you can jump rope, and boxing follow our main character to relax yourself. You can dance and do other exercises in this game too. You can use keyboard **WSAD** for move or **Up Down Left Right** Key for move, **Space** Key for jump, or gamepad for move and the **X Button** for jump. press keyboard **ESC** key to quit the game.

If you want play Extra Voodoo Doll Game:

1. For Win User, you can just play!!!

2. For Mac User, you should find the folder 'VoodooDoll-mac-x64' (this folder is in the root of the game 'Drop one NPC to another')
and in that folder it called 'myapp.app', and you have to give the permision to let it run!

3. For Linux or SteamOS or Ubuntu Users, you should find the folder 'VoodooDoll-linux-x64' (this folder is in the root of the game 'Drop one NPC to another')
and in that folder there is a file called 'myapp', you should use terminal cd in the folder 'VoodooDoll-linux-x64',
to run the game (Do not click it to run), you should then type ./myapp and press Enter Key

If you cannot see pictures in the game in Linux，try to move the whole folder 'VoodooDoll-linux-x64' to an USB flash Disk which format is exFat
and then cd in in the folder 'VoodooDoll-linux-x64',
then type ./myapp and press Enter Key
the reason is the format of your hard disk is not suitable for this game.
