Config
LOAD
SAVE

TIPS

- Each character has affection point, and it affects the choice of route in the latter part of the game.
- Affection point is added by choices in conversation, and also the order to choose places to go.

- ・The key is go to the place where the person you like is there first.
- ・Some early choices have long term effect to get CGs in the later of the game.
- ・Some scenes includes extreme expressions, including scatology. So please be careful.
