Get spirits to the swirl

Click a walking spirit to select actions

Grow to walk up

Dig to remove ground

Blow to add wind

Block to remove wind

Collect plants from air or ground

Hold down spacebar to speed up game

How to Play

Start the game, adjust your settings and click "Launch". On the main menu click "Play". After a short introduction movie, the first level starts. To clear a level, you'll need to guide a set number of spirits to the swirl.

Click on the spirits when they are walking on the ground to perform an action. Depending on the level there are up to four different actions available:

* Grow leaves to walk up.
* Dig to remove ground and create tunnels. This will also change the wind.
* Blow to create wind.
* Block to remove wind.

When clicking on a flying spirit, it will throw a spore to the ground. You can use spores to collect hard-to-reach plants for a higher world rank. You can also collect a plant by having a spirit walking over it. A plant is worth a thousand spirits.

When the spirits reach the edge of a cliff or a leaf, they will jump up in the air. The spirits will follow the wind and fly far distances in the air.

You will only need to save a certain required number of spirits to complete each level. Try to save as many spirits as possible and collect all plants for a higher world rank. You can see your world rank for each level in the level list. Click "Select Level" from the menu to open the list.

Controls

Click on the spirits when they are walking on the ground to perform an action. This can be also done when the game is paused.

Drag the screen to change the view, or move the mouse cursor to the edge of the screen. You can also use arrow keys to move the screen view. Use the mouse wheel to zoom in and out to get a better overview of the level.

Keyboard Shortcuts

* Hold down spacebar to speed up game
* P or ESC - Pause/unpause game
* M - Go to menu (only when paused)
* R - Restart level (only when paused)
* W - Wake up all spirits (only when paused)
* F11 or CTRL+F - Toggle fullscreen mode
* Arrow keys - Move screen
* Mouse wheel - Zoom screen
