Hello and welcome to the “abbys” of Umbra, here is the basic guide to survival.

- If a guy with a knife is coming after you, you probably would want to run.
- Hiding inside lockers can be risky, if the enemy saw you getting into one, you are probably going to be dead in the next 3 seconds.
- Watch out for your stamina bar, you only go a little faster than the enemies, so saving stamina is always a viable strategy.
- Look out for batteries, they are scattered across the levels!

Thanks for purchasing the game!
