
a. Hide behind walls (When you are near the concrete walls you press the roll and you hide)
b. Hiding crawl on the wall to the left & right (When you are hidden, using arrows you can move right or left)
c. Change side of wall hiding (When you are on the edge of a container and you reach the edge by pressing arrow and roll, you change side
d. Pretty cool jump (If you are in cement, hidden, with the Up arrow and roll you can jump over)
e. Hiding shoot (If you're in cement hiding and you aim, you get up and you can shoot. If you are in the container on the far left, with the left arrow you aim and shoot
f. Run to the wall (This is a tricky one. With the mouse, if you are a little close to a wall, a line appears starting from player to the wall and by pressing roll you run faster and hide in the wall)
