Beast Dungeon

Manual

Beast Dungeon is a classic roguelike dungeon crawler game.

It has 10 levels of progressively harder monsters. Can you survive the whole thing?

Gameplay

To attack monsters, simply walk into them.

To wear/equip items from your bag, just click on them. To remove items, click on them from the equipment screen.

You can save and load your game via the menu that comes up when you hit the escape key.

You can use the rest skill to recover hitpoints. Resting is dangerous, because time passes. With the passage of time, more monsters spawn.

You will heal naturally over time, but it is very slow.

To add spells to your spellbook, you first need to find a scroll to transcribe them from. Clicking on the scroll from your bag will add it to your spellbook.

Keyboard Shortcuts

B – Shows/hides the bag (inventory) window.

M – Shows/hides the spellbook window.
