Manual

1) To fire the main gun, click the left mouse button above the water level in front of the ship. The trajectory of the projectile will appear. If you release the button, the cannon will make a shot and the projectile will fly along the set trajectory.
2) To make a shot from the ship's onboard guns, press the right mouse button closer to the water when the mouse cursor is in front of the ship. In the same way the trajectory of the projectile will appear. Then release the button to make a shot and the projectile will fly along the set trajectory.
3) If the trajectory is red, you cannot make a shot because the gun is reloading.
4) As the enemies move towards the ship, it is better to shoot with a small prejudgment.
5) To pick up chests or shells with pearls click on the anchor or press the space bar on the keyboard. If the anchor collides with the treasure coins will go into your inventory.
6) To pause the game press escape on your keyboard or click on the icon labeled "hold".
