

How to Play

Rage Runner is a game focused around gaining speed and avoiding obstacles.

1. Gain Fuel

Fuel can be gained by picking up the blue collectible units. Fuel allows you to use your thrusters! Try staying in the stream of collectibles for sustained thruster use.

2. Don’t Hit Things

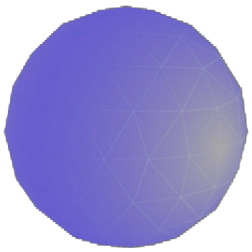
If you run into something with the front of the ship, things will not end well. Avoid doing this to beat the level. You may need to make the ship go vertical to squeeze through smaller spaces.

It’s safe to slide against obstacle surfaces with the sides and the top/bottom of the ship, just don’t hit things with the front of the ship.

3. Beat the Clock

If the clock reaches zero, it's game over. At the 10 second mark, the clock will flash and the warning siren will play.

Powerups



Powerups allow you to activate 1 special ability. You choose which ability to use based on your own playstyle or the situation.

Available Powerups

Missiles

Fires a missile straight ahead. The missile will destroy a single obstacle in your path.

Super Brakes

Brings the ship to a full stop for 3 seconds. Brakes can be canceled by thrusting.

Shields

Puts a protective barrier around the ship that lets you survive a single collision. Shields can be stacked!

Super Thrusters

A 3 second super speed boost! Twice as faster as standard thrusters. Super brakes can be used to cancel super thrust early.
