The essence of the game is to open the door to the next floor.
1st floor.
To do this, select 5 digits for the pin code. To the right of the door, from where you need to enter a PIN code, the desired input sequence will be displayed.
Where are the numbers hidden:
1 room - the number on a piece of paper, which should replace the question mark.
2 room - the room is behind the poster on the wall, to see it, you need to find a knife - it is in the trash can in the bathroom.
Room 3 - the correct number is the correct vaccine for the patient.
4 Room - the number is on the desktop of the computer. The password from the computer is in one of the toilets.
5 Room - A room written in the bathroom. To see this, you need to shine with ultraviolet flashlights. The batteries are in the box in the room where the computer is located.
Pass-84481.
2nd floor.
To do this, you need to activate 4 levers in the room after the laboratory.
1 lever - activated without problems, just need to click on it and select "Switch on switch".
2 lever - de-energized, in order to turn it on you need to go to the room on the left and collect the picture in the shield, then return and activate the lever.
3 lever - the most difficult in the game, you need to collect it. 1 part of the lever is in the pantry (room on the left at the beginning of the level). Part 2 is located at the tentacle in the tentacle, to pick it up you need to put the monster to sleep. To do this, there are scraps of recipes in the table on the starting location of the 2nd floor, use any modification and make any tentacle, then modify it in the sleeper (the lacking part of the recipe is exactly the same sleeping pill = water + belladonna and Syringe / Fucking / Sucking / Mustache tentacle).
Then we go through the small corridor to the room with the tentakle and pick up part 2.
sleep formula - (non furious tentacle) + water + beladona
Reset button-resets the combination to create a new one!
4 lever - you need to lubricate, greasing is willing in the corridor with a door to the tentacle.
To see the cherished 18+ scenes:
Modify the tentacle and excite it. Then you can try to pick up the lever through the door (not carefully for all users). You can also throw a tentacle each girl from the capsule, for this, also modify the tentacle and excite it, then in the laboratory click on one of the buttons (cool for the redhead girl and blue for the blue hair), the animation and sex is slightly different with each kind of tentacle.
3nd floor.
I think that this floor is the easiest one. To see all the scenes for adults you need to thoroughly explore the entire maze. There are 3 scenes in it. 1 of which is protected by a password which is available only for patrons (it can be found in the post release version 0.3 and higher). The last room of the labyrinth puzzles the puzzle on the wall; its essence is to assemble a phrase by moving the letters only vertically replacing each other (you cannot put empty spaces). Opposite the puzzle is a hint - what would the player understand what was going on.
Answer - The Minotaur was the fruit of the unnatural love of the Minos wife and the bull.
4th floor.
Walkthrough is not required. It is enough to read the text in the game. Though...

1 circle - 666
2 circle - 314
3 circle - 404
5th floor.
Hint in the central room on the wall. The numbers are scattered around the rooms.
The password for the door is 9754821
This will be enough. All rights reserved by common sense and high conscience.
