Developer's Note~

Thank you for playing Necrophobia! This is the first project that I've put out there in it's completion, so I hope you have just as much of an experience reading it as I did creating it~

Until we meet again~
Sapphire

How to Reset Game-

(Make sure game is closed)

Windows: Navigate to C:\Program Files (x86)\Steam\steamapps\common\Necrophobia\game\ saves and delete "persistent". Then press WIN + R and type %appdata% into dialogue box. Navigate to RenPy\Necrophobia and delete "persistent". (both "persistents" must be deleted before reopening)

Mac: Open Finder, and navigate to Home under "Go" at the top panel. Press Command + Shift + . to show hidden folders and navigate to the Library folder. Open the RenPy folder, then open the Necrophobia folder, and delete "persistent".

Linux: Navigate to /home/<User>/.local/share/Steam/steamapps/common/Necrophobia/game/ saves and delete "persistent". Then navigate to /home/<User>/.renpy/Necrophobia and delete "persistent". (both "persistents" must be deleted before reopening)

*Necrophobia folder may be followed by numbers
