THE STORY

The resistance is headed by Admiral John Wayne.
They have detected several strategic movements in a planet placed in the outer system
The rebel spies report that the YUK empire has built a destructive weapon that could unbalance the current war.
Codename: PROJECT XINATRA.

In order to locate and destroy XINATRA, the Admiral Wayne has hired the best bounty hunter in the Universe.
Nodody knows his name, but he is known for his courage and skill in the battle.

THE STORY

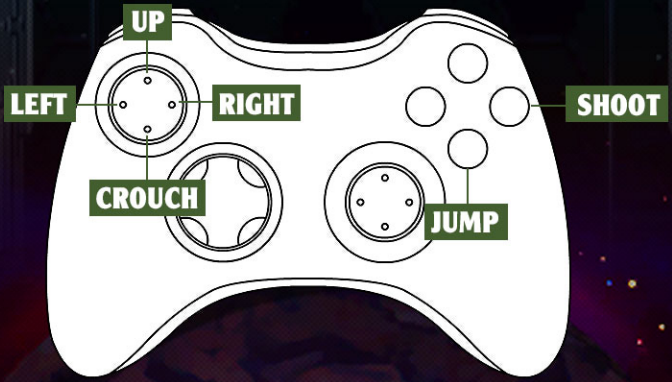
The soldier is ready for the mission. He has fought in many battles
but what is about to happen, will be too hard even
for someone like him.

Under the steel helmet, he hides his identity,
but also his ruthlessness and brutality in the battlefield.
He is not a good man, he is a war machine, ready to fight and die.

Now, the bounty hunter heads to his goal: PROJECT XINATRA.

CONTROL

YOU CAN REDEFINE THE CONTROLS FROM THE MAIN MENU



The game detects if you have some Joystick or pad connected. In this case you could play to the game with pad and/or with keyboard.

Xinatra v.1.1
