How to Play

Controls are as follows:
Move the paddle with your mouse. Left click your mouse to launch the ball from your paddle at the start of every level. You can press the escape key, or click on the pause button, at any time during levels to pause the game. In the pause menu, you have the option to resume, go back to the main menu, quit, and to turn off sounds.

Survival Mode Game Flow:
Your score is displayed in the upper right corner of the game. If you lose a level, you start back over at whatever level you are currently on. There are no lives, but your score goes back to zero. There is a feature of the game that will allow you to skip a level after you lose five times. This is called the level skipper. If it is on, it will ask you after failing a level five times if you want to skip that level. If you want to skip that level, select "Yes". Your other options include the following:

1) Maybe later – this will ask you after five more attempts if you want to skip the level this time
2) No – this will ensure that you won't be asked again on this level if you want to skip the level
3) Never – this will turn off the level skipper feature. It can be turned back on in the pause menu, or in the settings menu on the main menu

The level skipper is built in for people that are getting frustrated at a level and would prefer to just move on. The downside to using the level skipper, is that it reduces your opportunities to get a new high score. At the end of the game, your highest score throughout the game will be displayed, and will be added to the high score table if it is a high score. The high score table can be found by pressing the "High Score Table" button in the Survival Mode menu. There are currently fifteen levels. You must make your way through all fifteen levels in order to have your high score count and be added to the high score table.

Levels Mode Game Flow:

You start off only having level one unlocked. As you beat levels in Levels Mode, then more levels will be unlocked. For each level, there are objectives that you must reach to obtain all three stars for that level. In order to get to the next level and one star, all you have to do is beat the level. However, if you want to get all three stars, you must master the level enough to complete the objective. There are different skins for the paddle and the two types of balls in the game. These items are unlocked by gathering stars, and can be found by clicking the "Select Items" button within the Levels Mode menu.
