The Graffiti Creator
Manual

Overview: The Graffiti Creator is an application for making graffiti artworks.

Text: Current limitation for text input are: A-Z, 10 characters max,
no spacing (it's user customized).

Fonts: Choose betwen different fonts: Sleek, Bulky

Elements: Each font come with their own unique elements such as drips, stripes and highlights.
These can all be separately modified by the user.

Color Schemes: The user has the ability to manipulate every color as she choose but there are also
a number of premade color schemes to choose from. These can later be modified if needed.

Backdrops: There are a number of backdrops to choose from. If no backdrop has been selected your
rendered image output will have a transparent background, just the design and effect
elements will be visible.

Effects: Effects are extra elements that can be applied to the graffiti design such as drips,
splatter and highlights.

Save: All user made designs can be rendered out as a png image.
The file size is set to 1283 x 441 pixels at 72dpi.
The user is free to print / publish their artwork for personal use.

Selling artworks or promoting products/services is not allowed.
