LILA'S SKY ARK

Official Soundtrack by Gerrit Wolf

When Richard and Günther asked me in late 2020 if I wanted to contribute to the production of “Lilas Sky Ark”, it was clear to me that I didn’t just want to contribute “something”, but wanted to take over the complete production of the soundtrack.

Why?
Because there’s just nothing better than participating in something lasting and awesome, something that encourages your own creative work and will definitely get published later. I know many projects that never made it to be published. With Günther and Richard, thanks to our previous collaboration on “Resolutiion”, it was clear to me that “Lila” would also see a release. No matter if we were to impoverish ourselves: no matter what, I knew there would be a release.

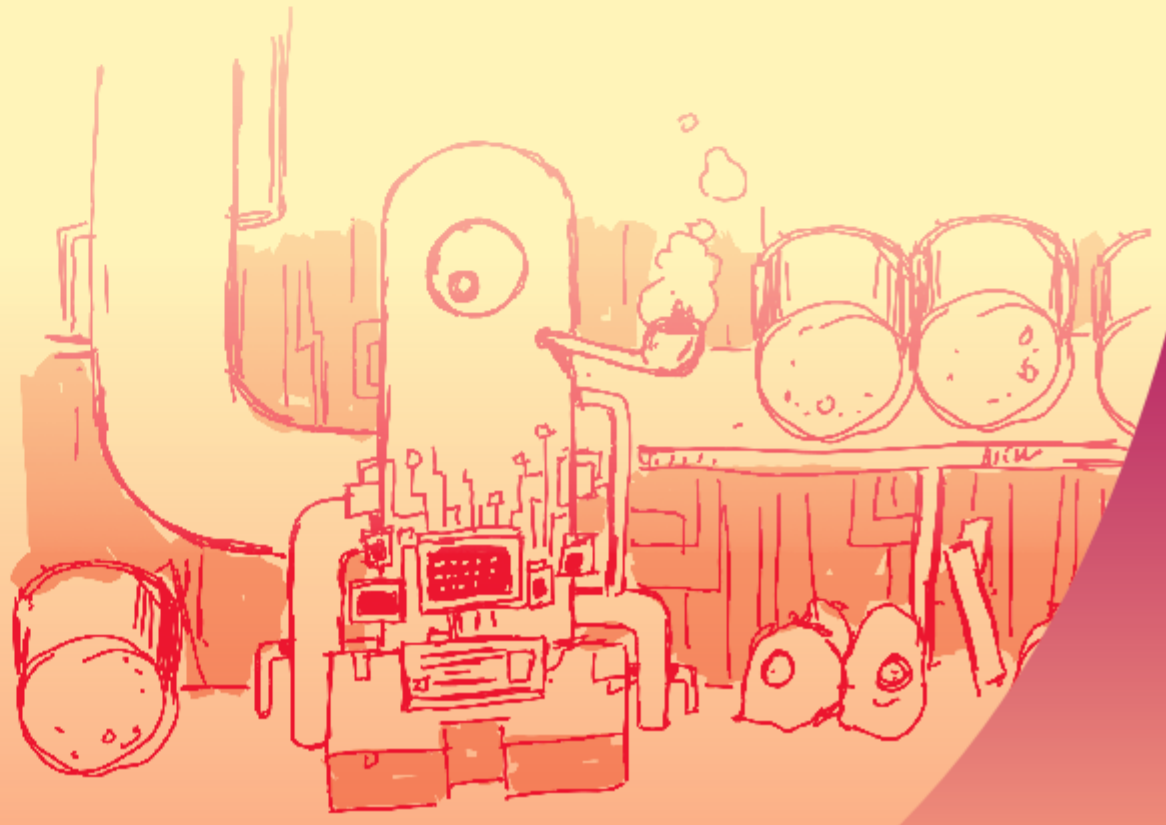

So of course I said yes.

These two guys already made it clear to me on “Resolutiion” that they are always serious. In addition, "Lila" was so beautiful and heartfelt to look at that the ideas for it inspired me right from the start. That’s how I had to arrange the music. It’s this crazy mix of calm and beautiful themes paired with brute force and orchestral motifs. This is more evident in “Lila” than ever before.

And what I appreciate most about working with Monolith of Minds: I almost always have the freedom to compose how I want to. And that’s just the best thing that can happen to a composer.

So, as always, I am very grateful for this opportunity to contribute to this beautiful game. I hope you all find some hope, love and above all fun in this music.

Enjoy! – Gerrit

1 Wake Up, Lila
2 Welcome to the Rainbow Ark
3 Forest Adventure Ahead
4 Spirit of the Trees
5 Lord Whisp Awaken
6 The Drummer
