Q&A

1、What should I do on the training ground?

Enter the training ground under the guidance of the instructor, and pick up the initial firearms and ammunition on the table after arriving at the training ground. After shooting all the machine targets, the instructor will guide you to the next session.

2、Why did the gun disappear after the right hand was released?

The firearm is worn on the waist. After releasing the firearm, the firearm automatically returns to the waist. When you need to shoot, the firearm is removed from the waist.

3、The amount of magazines in the training ground is too small?

The magazines appear randomly in any scene of the map, and players can pick up enough magazines to complete the shooting during the game.

4. How to enter the dormant cabin?

Select any dormant pod, move the direction to the selected dormant pod, and face the dormant pod to enter.

5. What should I do after coming out of the dormant cabin?

The oxygen in the space station was damaged, and the remaining oxygen after coming out of the dormant cabin was insufficient, and it was necessary to inject oxygen at the machine in front.

6、When do oxygen and HP need to be supplemented?

Oxygen: Oxygen is dropped every second over time, and you need to pay attention to replenishing the oxygen value at any time.

HP: The health value will only decrease when it is attacked, and it should be replenished when it drops to 50%.

7. Why can't Oxygen and Armor Repair Fluid (HP) be stored in the same way as the magazine?

In the early stage, you cannot store oxygen and armor repair fluid (HP) without obtaining a backpack. When you obtain a backpack, you can store it in the backpack and take it out of the backpack when needed.

8、Can't use the joystick jump button in the map?

You cannot use the jump key to enter the parallel space, you need to use parallel movement.

9、Sufficient amount of oxygen or armor repair fluid (HP) but it says "Mission failed"?

The escort process is time-limited, and the escort needs to be completed within the specified time.

10. Resurrection: How to revive when the oxygen or armor repair fluid (HP) is 0 down?

Oxygen or armor repair fluid (health value) is 0 down, it is regarded as mission failure and needs to restart.

11. What should I do if I want to play online with my friends?

"Wandering in Space" currently only supports stand-alone, and the online mode will be gradually opened in the future, so stay tuned.
