

SVFI After Effects Support Plugins

v0.0.0, 2024/02/03

Plugin Location: **svfiPlugins_v0.0.0.jsxbin** at SVFI installation directory

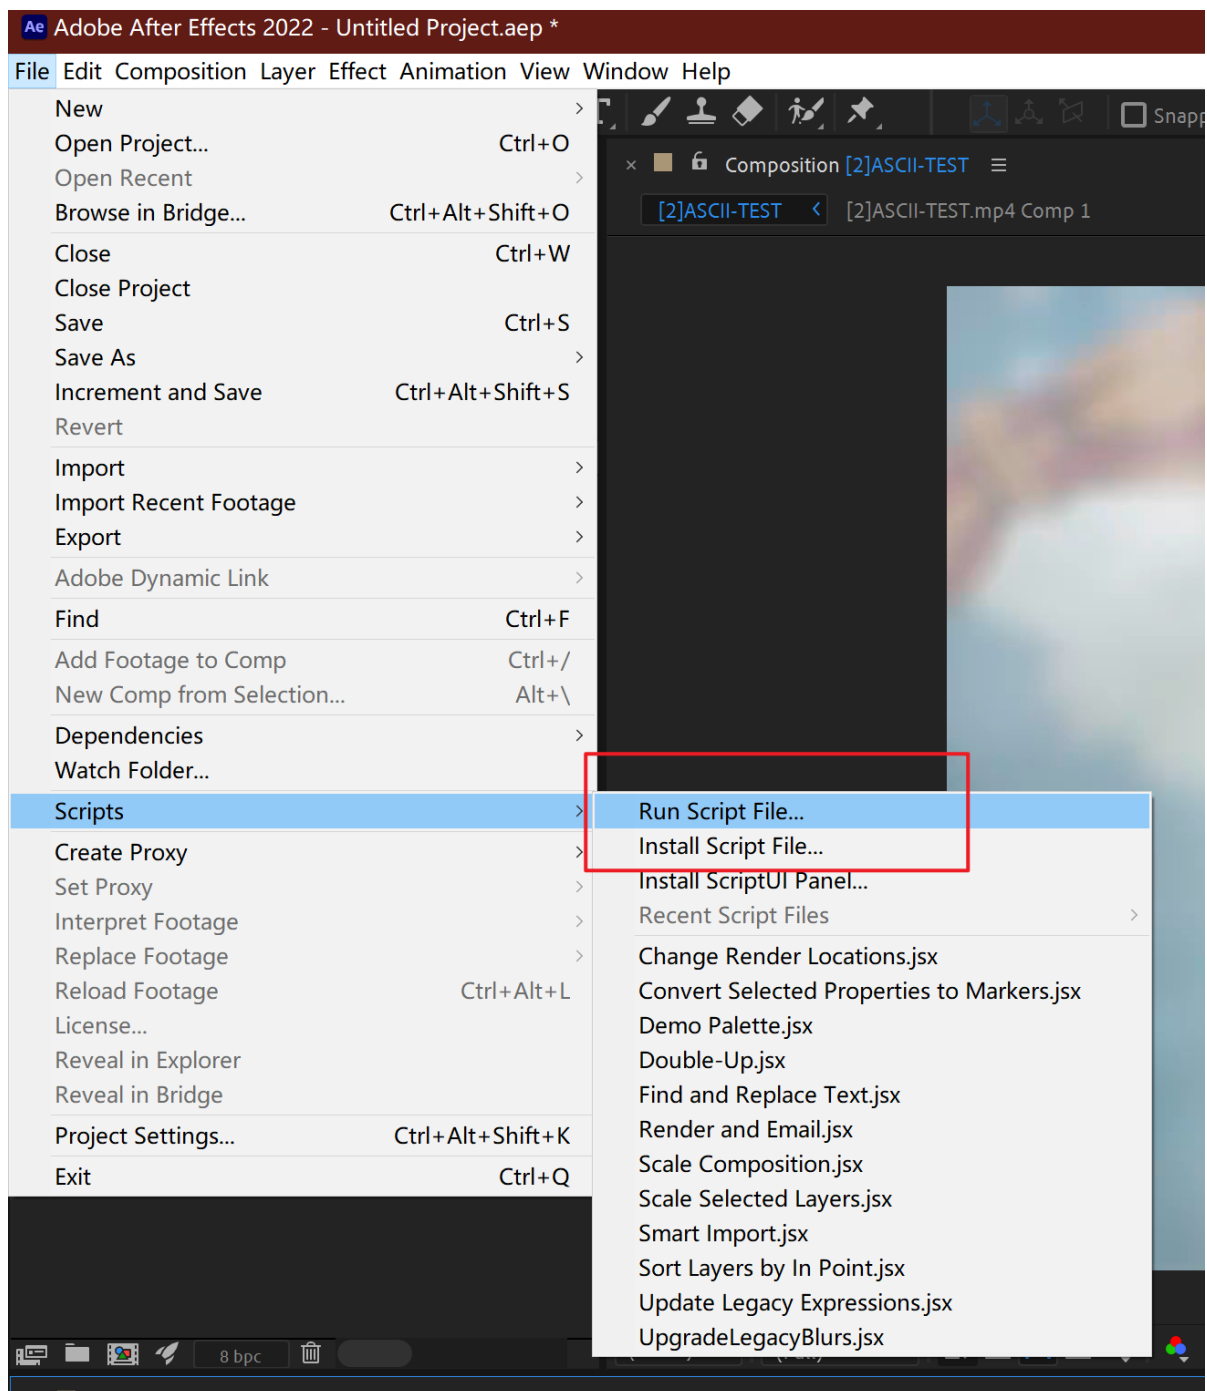

Tested version: After Effects CC 2022

Feature Overview

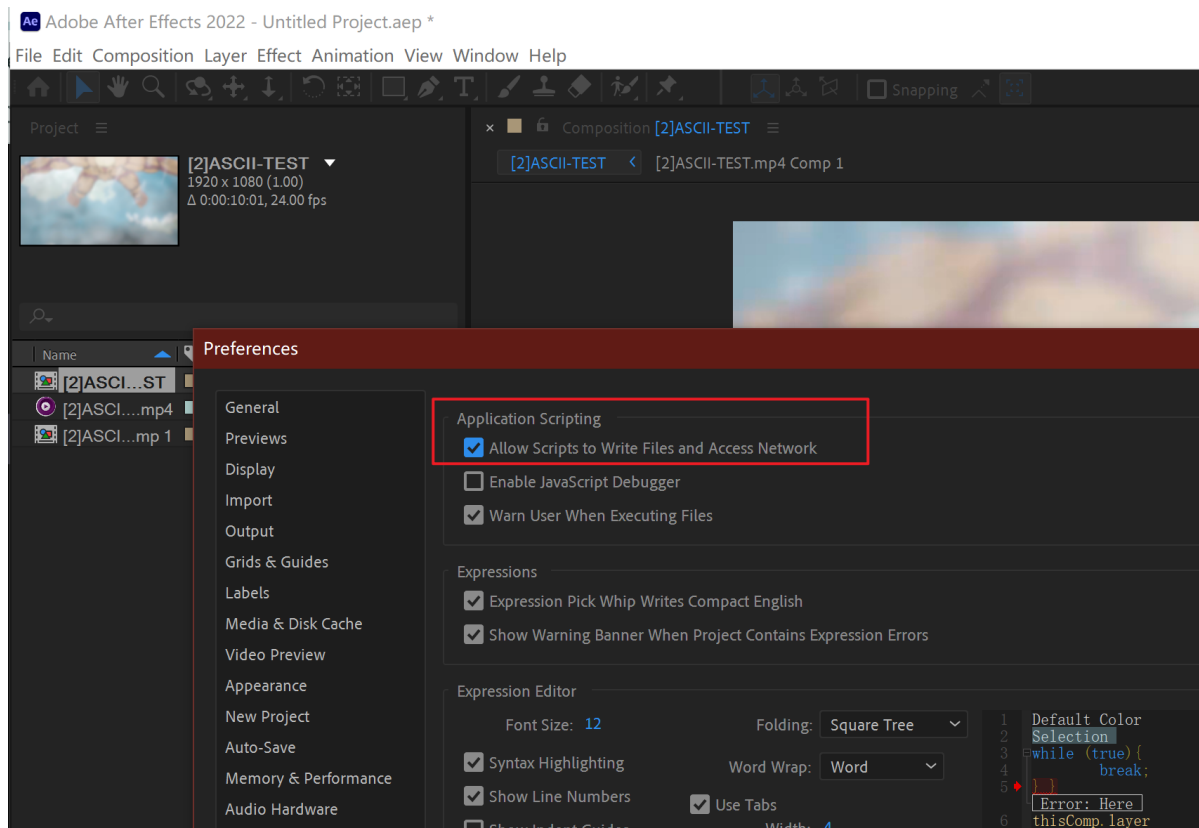

- The plugin swiftly exports the **selected compositions** from the **current active composition** as **temporary lossless files**.
- After manual importation into SVFI for processing, the plugin promptly re-imports the output files back into the **original active composition**, automatically aligning the start points, in and out points, as well as the stretch ratio.

User Guide

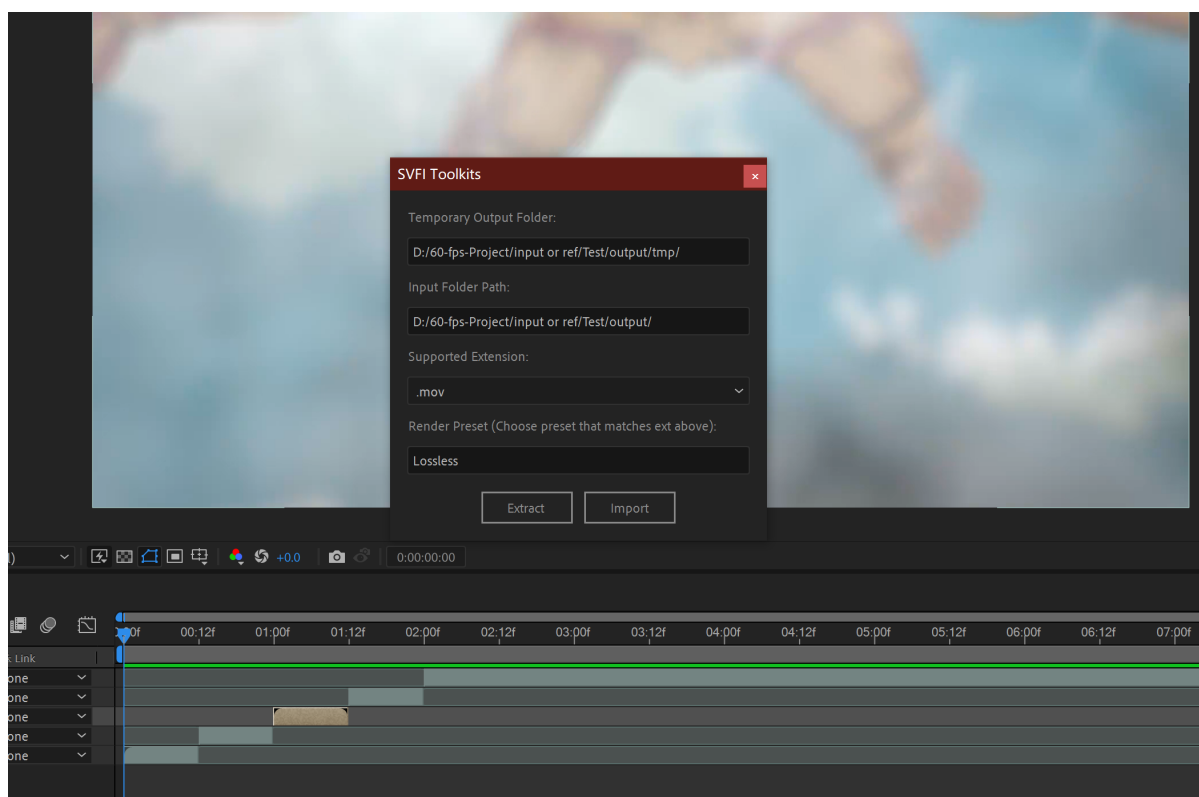

Running the Script

Allow Permission

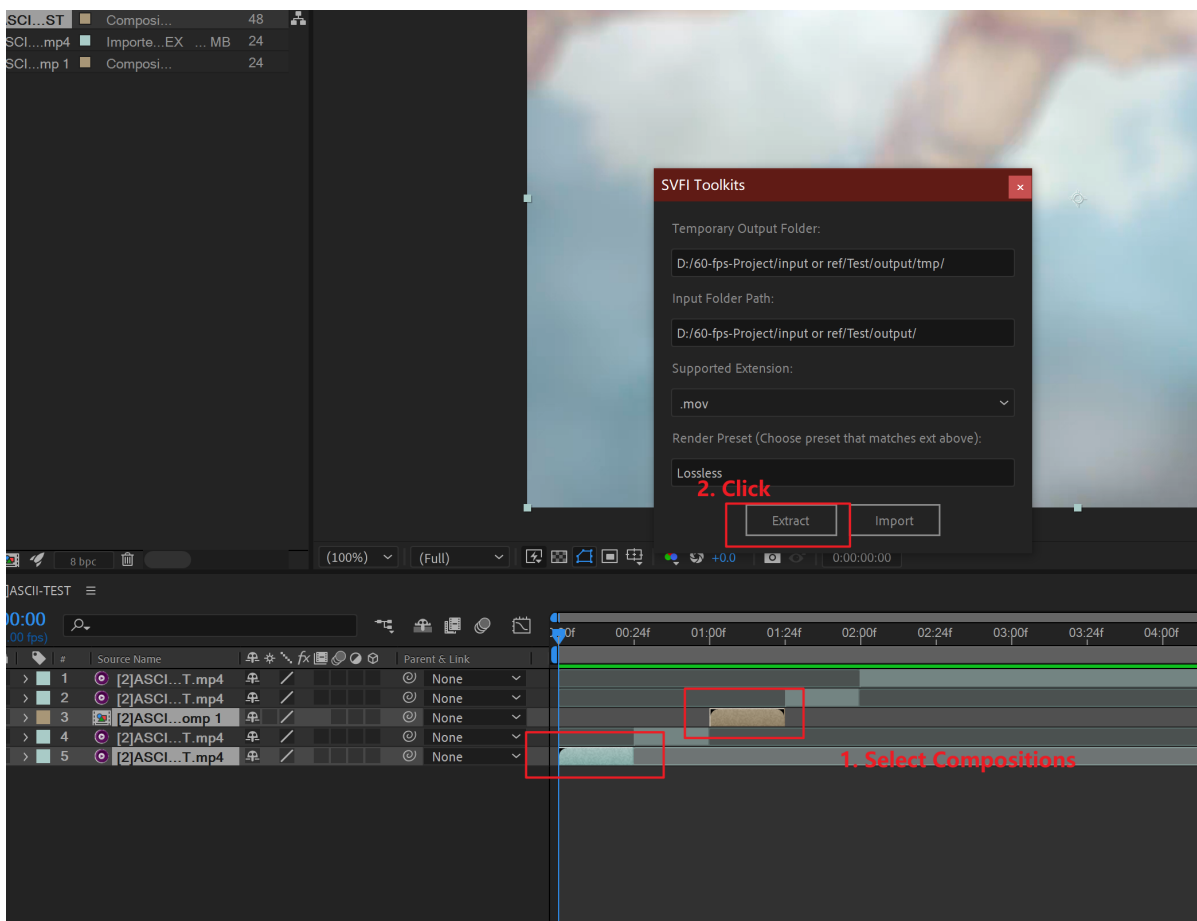

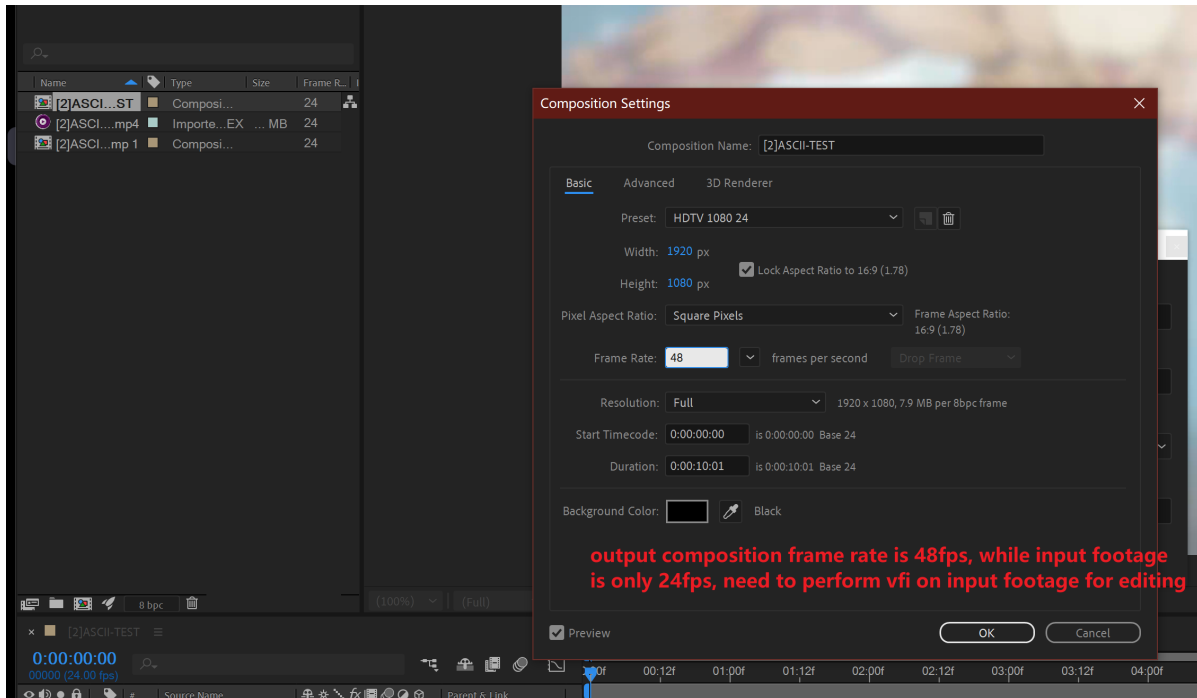

Introduction of Plugin Component

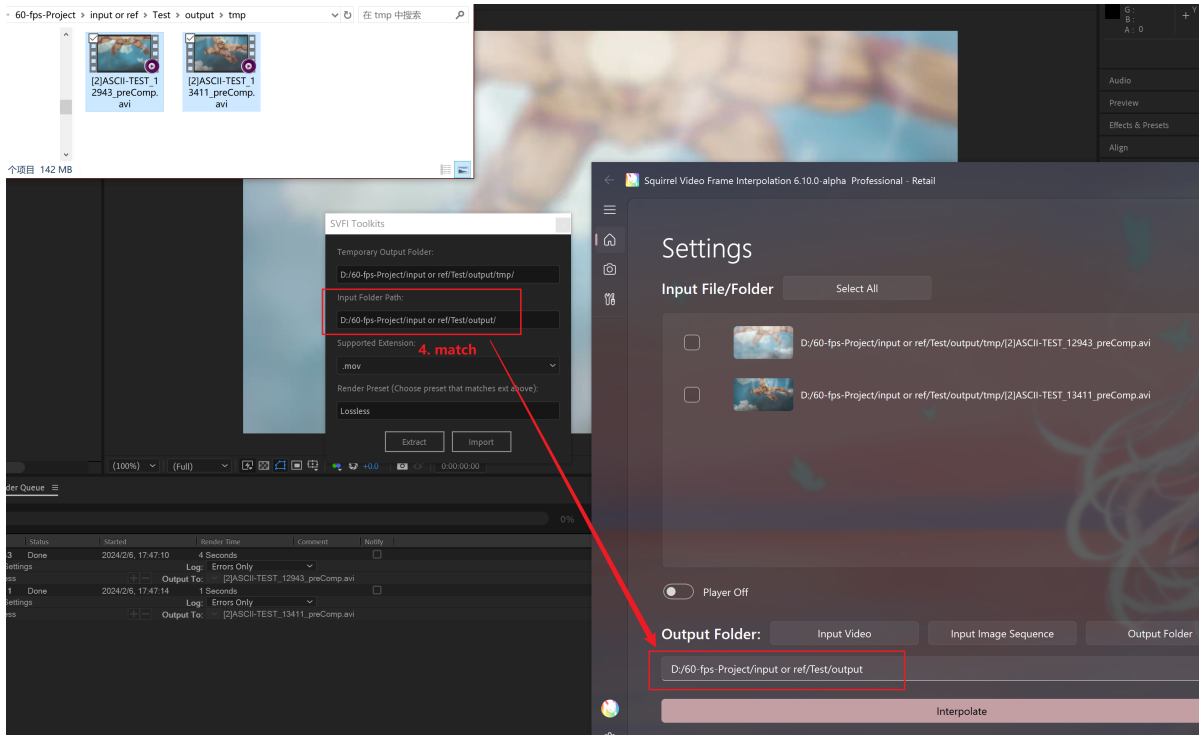

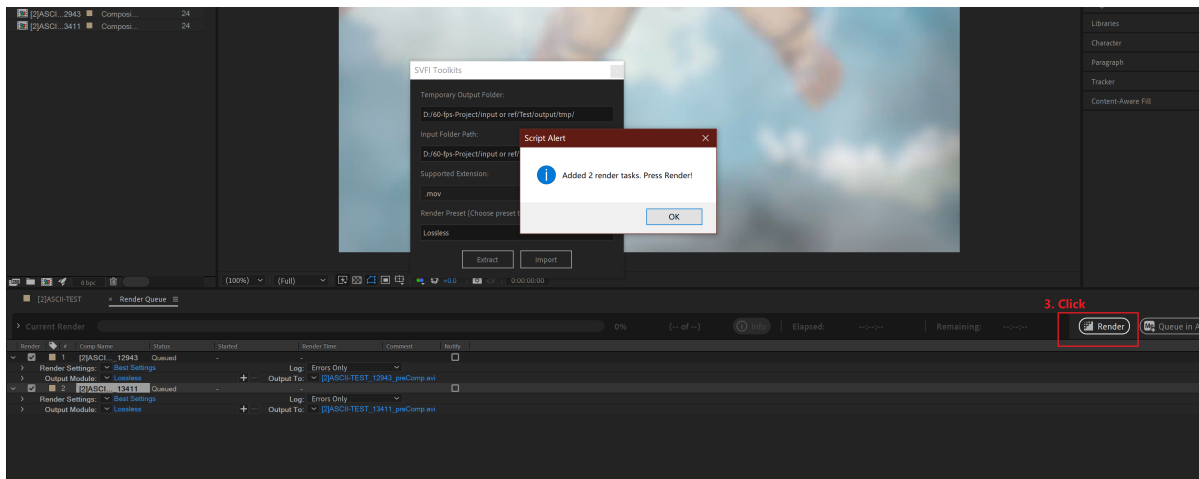

- **Temporary Output Folder:** This folder is the output folder of those temporary rendered output of selected compositions after clicking **Extract** button.
- **Input Folder Path:** After clicking **Extract** button and start **Render** in **After Effects Render Queue** manually, user needs to drag the output rendered files into SVFI and perform (in later version these steps shall be done automatically) VFI or SR process. The output folder of SVFI is **Input Folder Path**

- It's recommended to assign different directory for Temporary Output Folder and Input Folder Path.
- **Supported Extensions:** Need to be the same with render preset you use in After Effect output

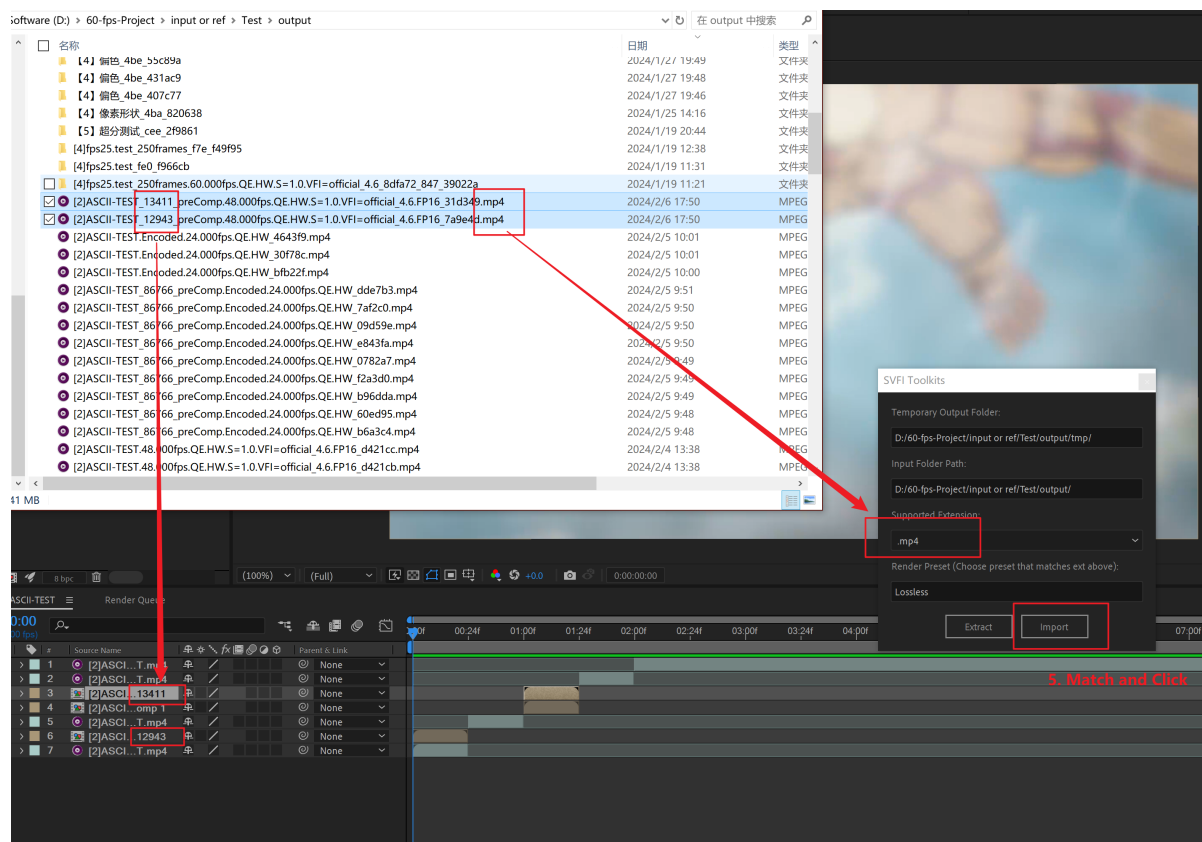

Step by Step tutorial

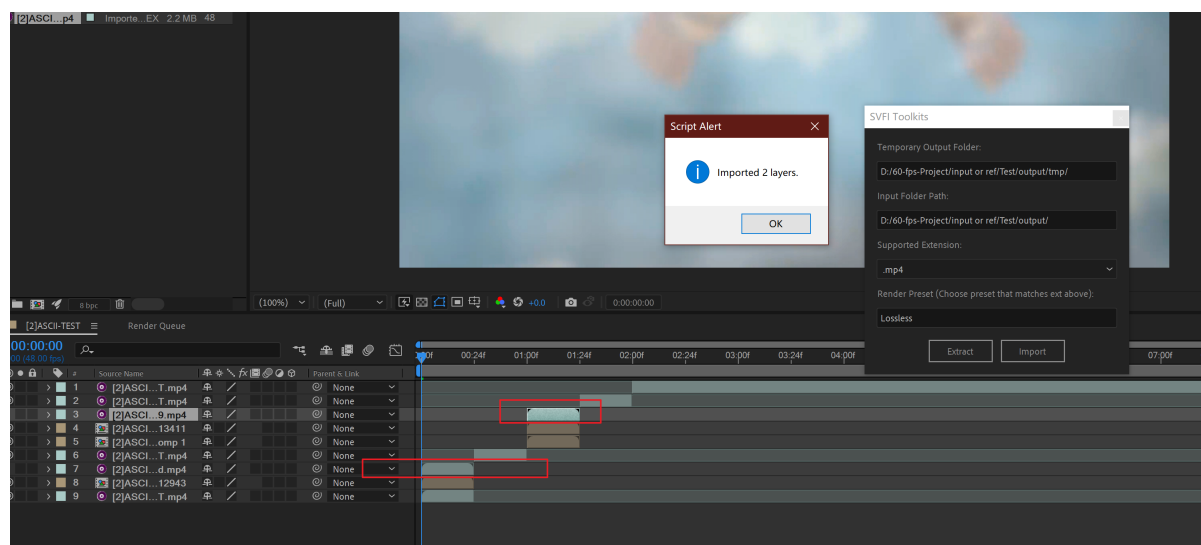

Disable Auto Correction in Preference to speed up.

After SVFI finishes its task, execute the following:

Result:

Additional Information

- The plugin is currently under development, and additional functionalities will be incrementally added. The primary objective of this plugin series is to enhance the interaction and efficiency between Adobe products and SVFI in a straightforward and effective manner.
- The usage process will be further simplified in future updates.
- Planning for an Adobe Premier Pro plugin is underway.
- Support for alpha channels is also in the planning stages.
- **Note:** If the file names outputted by SVFI are altered, the plugin may not automatically recognize and import them.
