To see controlls choose OPTION in main menu.

To select 2nd player press A on a controller

There are 3 Arenas, picked after characters rise from portals (don't press any button before selecting arena)

Ecilop City Arena is the lowest performance (needs more optimization) and has camera clipping through the walls problem

For the best experience try Quakva's Swamp and Naga's Palace Arenas.

To exit during gameplay press start on gamepad

Enjoy.
