Map selection

Once you've finished selecting the map, click the "Click to Enter" button at the top right of the map screen to enter the fishing area.

Character Movement

Character movement in this game is very simple. Just click on the ground, and your character will move directly to that area.

Advanced Character Movement

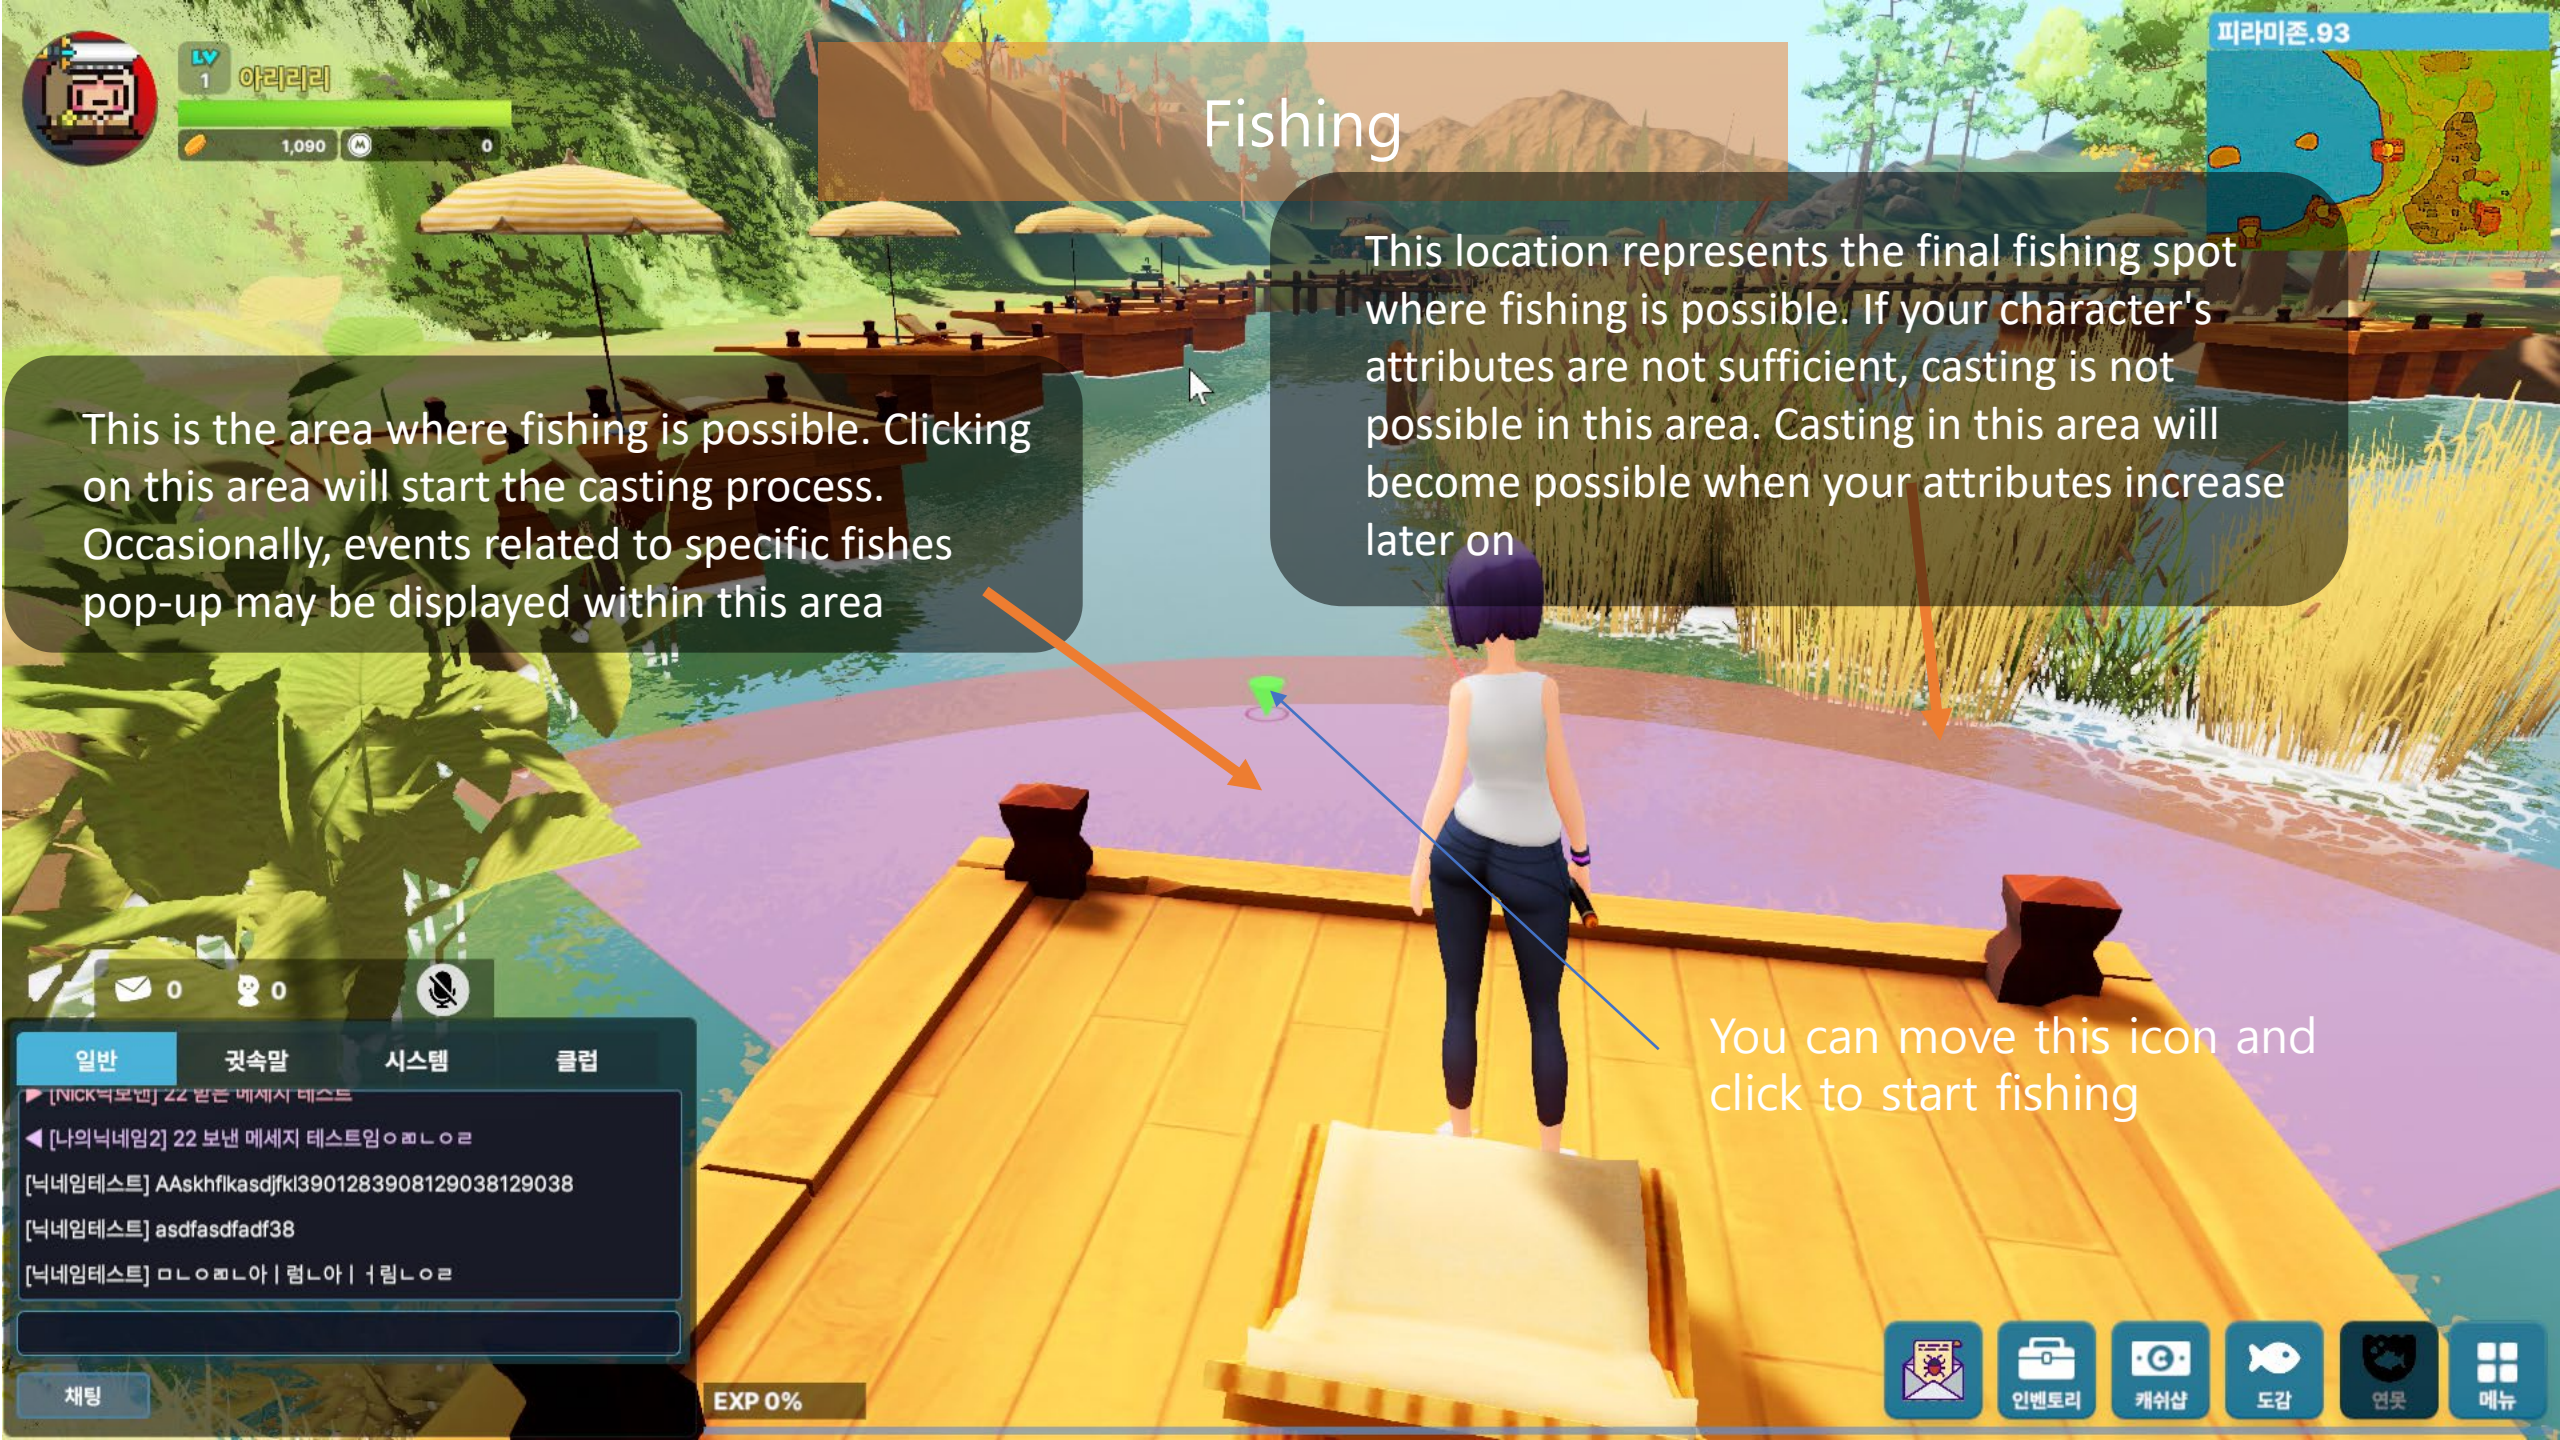

Of course, We also have more precise control.
You can move using A,W, S, D, just like in typical games.
By holding down the right mouse button, you can adjust the camera perspective

Fishing
This location represents the final fishing spot where fishing is possible. If your character's attributes are not sufficient, casting is not possible in this area. Casting in this area will become possible when your attributes increase later on
This is the area where fishing is possible. Clicking on this area will start the casting process. Occasionally, events related to specific fishes pop-up may be displayed within this area
You can move this icon and click to start fishing

Fishing - Dragging

You can use the arrow keys to deal damage, and left and right mouse clicks also work the same function

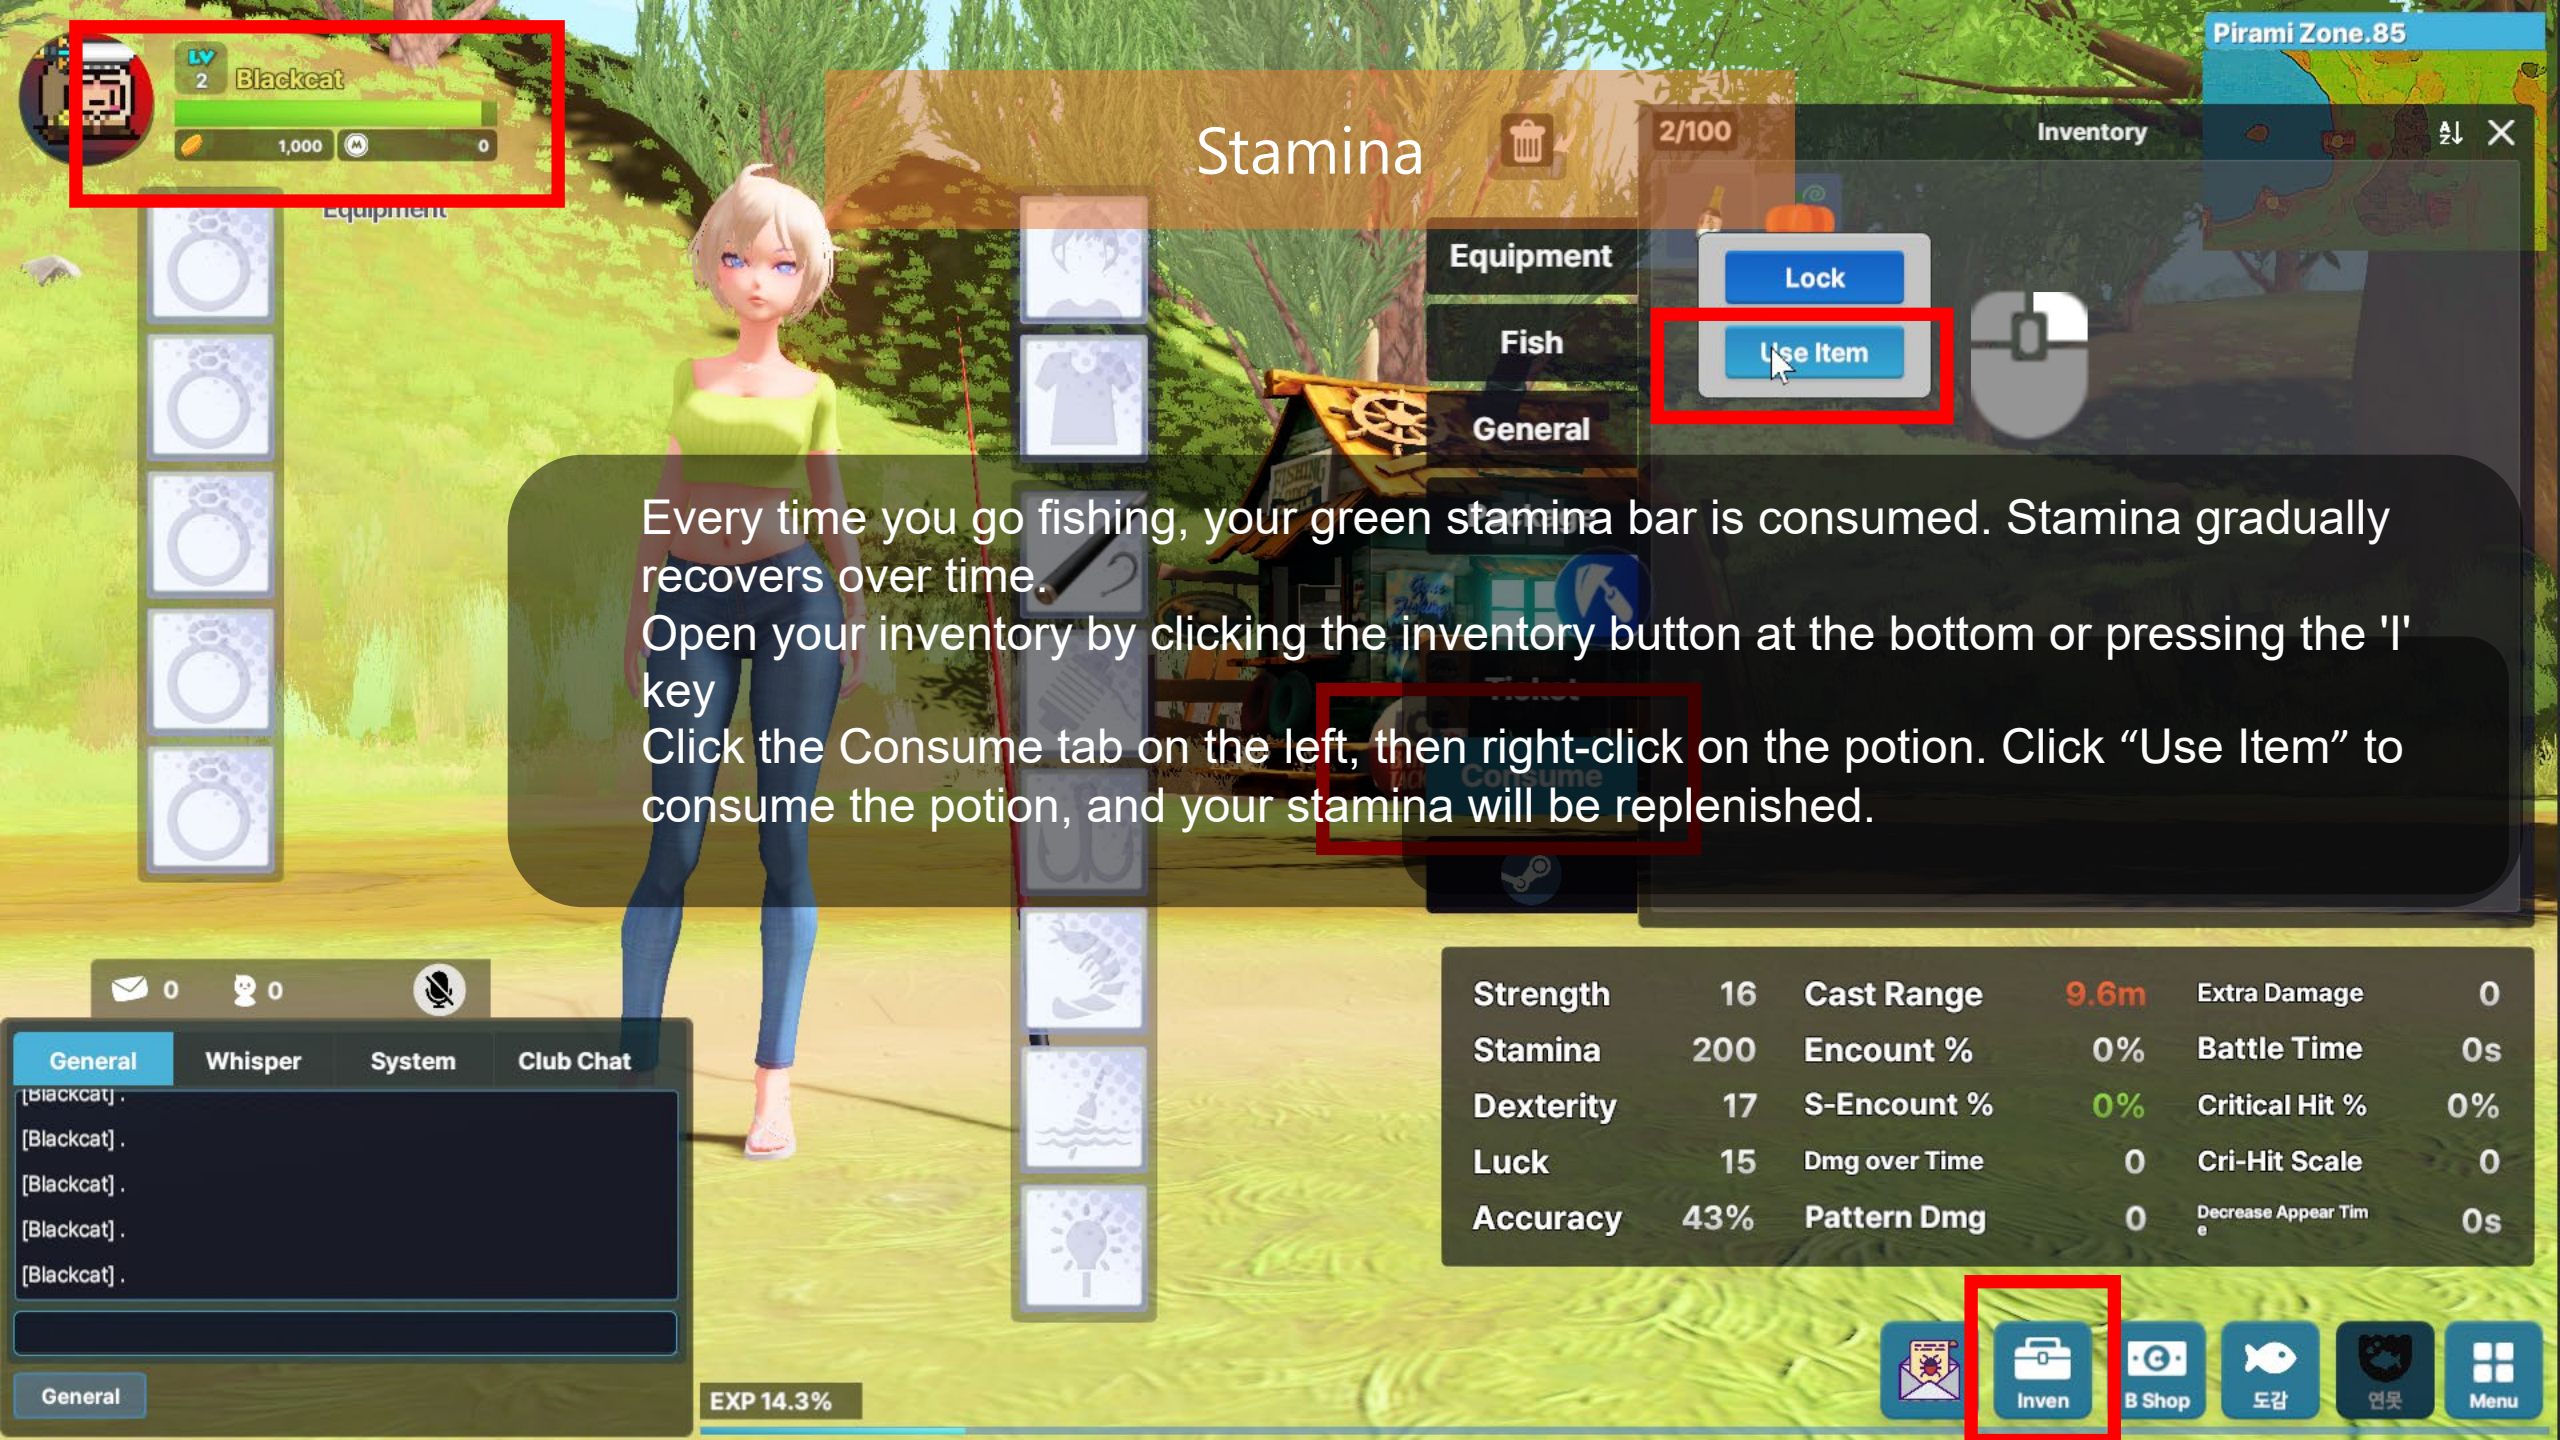

Fishing - Pumping

Press the spacebar (or left-click with the mouse) when the large circle matches the small circle in the center of the fish.

Fishing - Rush

Stamina
Every time you go fishing, your green stamina bar is consumed. Stamina gradually recovers over time.
Open your inventory by clicking the inventory button at the bottom or pressing the 'I' key
Click the Consume tab on the left, then right-click on the potion. Click “Use Item” to consume the potion, and your stamina will be replenished.
