1-The default (and best) screen resolution to select for the game is : 1920 x 1080. Make sure it is selected if you want to use it at the start of the game. I have done my best to accommodate other screen resolutions as well . If they don't work I apologize for that.

2-Some small files will be created as you run the game. Please don’t delete them as they are important for running the game and saving your settings, preferences and progress.

Thanks for downloading and trying my game.

Ahmed :)
