How is it different from other games?

Open world, various stories of the multiverse

- Conversation and interaction between humans and characters in the game through human AI function of voice recognition
- There is no drawing, which is a gambling element, and almost 100% equipment and weapon combinations.
- It is not boring with full dubbing, and voice recognition is applied to some NPCs.
- Various skills for each weapon, manual hunting with a sense of accomplishment, non-target
- Multiverse story based on Greek mythology
- Integrating game money (Gold) in our other games, such as Fire Racing

Multiverse

A multiverse worldview where the story unfolds from the story of the ancient war based on the early Greek gods to the present and future world

■ Ancient story: A story unfolding by meeting various monsters in the midst of hardships and adversity to find the ancient Greek gods who have disappeared. One day, a climate change that lasted only one season per region suddenly came. <Athena>, the goddess of war, sought other gods to find out why this phenomenon happened, but only their statues and paintings remained in the temple.

While <Athena> was investigating the stone statues left behind by the gods, she found out that many monsters ruled over all these lands. In the end, <Athena> learned that she had to defeat all these monsters while traveling through the 8 regions of the land of the 4 seasons one by one. Therefore, <Athena> explores the four seasons and learns the weapons and magic of the gods to defeat the monsters. Where did the other gods go?

■ **Modern/Future Story**: <Athena>, the goddess of war, discovers a strange place on her journey to find the ancient Greek gods. <Athena> even meets creatures with bizarre appearances that were not seen in the ancient gods... .

- Where are the gods?
- The great epic of gods and heroes..
- A thrilling story that crosses the virtual world and the real world.

- Various stories and episodes that take place in the game.
- A metaverse game where in-game avatars talk to real users.
