Ground Control Anthology

For customer support, email support@rebellion.co.uk

More Information

For game and manual updates, refer to “readme.txt” and “readme_addon.txt” in the root folder of where the game files are installed.

To locate the game files:

- From the Steam client Library, right-click “Ground Control Anthology”
- Select “Properties” from the menu
- Select “LOCAL FILES” tab
- Select “BROWSE LOCAL FILES…” and a Windows Explorer window will open with the game files displayed

Online Play

Because WON.net is no longer operating, playing over the Internet is no longer possible. Playing via a LAN is still available.

Graphics Issues

Check your graphics card drivers are up to date.

D3DXERR_INVALIDMODE

If you encounter a “D3DXERR_INVALIDMODE” error message when launching the game, check your graphics card drivers are up to date.

Game Minimises to Task Bar

If the game launches and minimises to an icon on the task bar, try the following:

- Hold the Alt key and tap the Tab key until “Ground Control Anthology” is selected, then release the Alt key. If this doesn’t resolve the issue, close the application by right-clicking on the task bar icon and select “Close window”
- Try changing the desktop resolution to a lower resolution, for example 1024x768, 1280x720, or 1280x768 (depending in the aspect ratio of your monitor).
- If you are using a dual monitor set up, try unplugging the secondary monitor and launching the game.

Audio Issues

Check your audio card drivers are up to date.

Windows Firewall

Windows Firewall may block Ground Control Anthology from accessing the Local Area Network for LAN play. If you see a pop-up Windows message saying “Windows Firewall has blocked some features of this program” – select “Allow access”.
