Flatspace IIk

We Robot Music Pack (2023)

by
Mark Sheeky

Music of Steel and Intellect

This is the 5th Flatspace IIk music pack. Like any in-game music for Flatspace, music will trigger at random when you enter a new sector.

This pack contains special Flatspace versions of tracks from the 2023 concept album We Robot by Mark Sheeky. The initial release corresponds with the release of the single 'AI and Celebrity' on 29th September 2023, with extra tracks to added after the release of the album on 27th October 2023.

These instrumental versions of the tracks were created to complement the feelings of space that characterise the Flatspace universe.

Included Music

AI and Celebrity (Flatspace IIk Mix)
An instrumental version of this single release.

AI and Celebrity (Adrift Mix)
The eerie introduction to AI and Celebrity which seems to echo the feelings of much of The Flatspace Soundtrack.

Hydroxychloroquinine Aspartame (FIIk Mix)
The 'B-Side' to the AI And Celebrity single, the full version of this song is exclusive to the single. It's also the only track with any links to actual Artificial Intelligence (none of the album, its music or visuals, use AI). This melody was generated using a heuristic intelligence called Oldfield 1; it's based on a track called Yellow Balloon Attack.

The lyrics in the full song joking allude to a quest for life-enhancing pharmaceuticals.

Robot (Flatspace Mix)
The origins of this song date back to the Flatspace era (yes, that old!). It was finally recorded with lyrics in 2023. This edit features the Flatspace Theme instruments to great effect.

Where Is Love (Star Mix)
A gentle drift of a tune. Space awaits...

Fake Plastic Lies (Flastic Mix)

An unusually bright and up-beat track for Flatspace. A melody to trade by.

Credits

All music composed, performed and produced by Mark Sheeky.
