【Screen Resolution Settings】

*This game is designed to be played in a 1920 x 1080 (16:9) resolution environment.
To play on a PC with a different environment, we have provided a resolution change function.

If your monitor’s aspect ratio is not 16:9, please try window mode using the following steps or adjust your monitor from your Windows system. Lowering the resolution and resolution scale will reduce image quality but may reduce the load.

If you are concerned about your PC’s performance,
lowering the values may improve game performance.

You can set it in the ‘SCREEN RESOLUTION AND MODE’ in the title menu.
If the monitor is not displaying properly, use the ‘Change Procedure’ below or press ENTER after moving up three times in the title menu.
