INTRODUCTION

Yee-Haw! Are you prepared to experience all of the rootin-tootin' excitement of Offroad Redneck Racin'? You'll feel the thrills the moment you're plunked bee-hind the wheel! Breathtaking graphics and sophisticated car handlin', coupled with a real physics engine (whaddya reckon' that is?) guarantees a racin' experience that's more fun than a hog killin'!

Are your drivin' skills good enuff to take you from division 4 up to the ultimate goal of winnin' the Drivers Championship? It'll be your drivin' skills alone that will earn you invitations from other teams, upgrades from your sponsors and promotion to a higher division. Offroad Redneck Racin' features the most comp-ree-hensive offroad championship ever. You'll be comin' back for more, ya hear?

Offroad Redneck Racin' also features Challenge and Time Trial modes. Challenge offers you the chance to drive against CPU cars of varyin' skill levels at the location and track of your choice, as well as a 2 Player mode featurin' a split screen configuration (I'll be darned). Time Trial offers a different scenario: compete on your own in a bid to shave seconds off of your fastest lap, then visit the fastest times gallery to see if any of your times have made the Top Ten. For multi-play enthusiasts we offer LAN racing for up to 6 players, allowing you to take on your friends in mud-splattered head-to-head races. Now git' goin' boy!

INSTALLATION PROCEDURE

To install this product correctly please follow the instructions below:

1. Put down your banjo and insert the CD-ROM into the CD-ROM drive.

2. If your machine does not display the installation Menu after a few seconds it means that either your CD-ROM drive does not support Autoplay or you do not have this feature turned on. If this is the case, you will need to access the Installation menu via Windows Explorer. To start Explorer, right click on the Start button on the task bar, and then select Explore. In Explorer, locate your CD ROM drive letter in the left hand window and then click the label. In the right hand window, double click on the setup.exe icon The installation menu should now appear.

3. The default install directory is C: Program files Interplay Redneck Racing. To choose a different destination, click browse, select the desired directory then click Next.

4. The Installation Type screen then appears; here you decide the size of Install you require. This will determine how much space the game requires and how quickly the game will load. Full installation will require the most space but should also cause the game to load fastest. Note that all installa tion types will require the CD to be present in the drive in order to play the game.

5. The Select program Folder screen will now appear. Choose the destination folder in which you want Redneck Racing to appear in the Start menu then click Next.

6. The game will now begin installing. You will be informed when Installation is complete. Upon completion of installation, select Finish.

7. You will now be given the option of accessing the README file for known issues and last minute updates concerning Offroad Redneck Racing.

8. The installation program will then automatically run the Setup program for the game.

GAME SETUP

1. If this is the first time that you have run the Setup program and you already have Direct 7 or above installed on your machine then you will be taken automatically to the Hardware Setup screen. This screen allows you to select your preferred display device and any available display modes; you can also choose to disable any audio support. When you are happy with your setup click on the OK button. You will go back to the Setup main menu.

2. If you do not have DirectX 7 or above installed then you will be taken to the Setup Main Menu where you have the option of Installing DirectX 7. After installing DirectX, you will need to go to the Hardware Setup as detailed above.

3. Once you have Installed DirectX and the Hardware Set-up has been com pleted then you can play the game by clicking on the Play Offroad Redneck Racing option or choose Exit to return to Windows.

4. You can run the game in the future from the folder you installed it to in the Programs Menu (accessed by clicking on the Start icon in the bottom left of the Windows desktop screen.)

5. If you need to run the Setup program, again this can also be accessed from the Programs Menu.

6. Other options selectable via the Start Menu are Uninstall Offroad Redneck Racing, visit the game and Rage websites.

GETTING STARTED

After loading Offroad Redneck Racing the introduction movie will play. To skip this at any time press the ESC key. You will then be presented with the main menu.

Navigating the menu system couldn't be easier. Using your keyboard, mouse or joystick simply highlight the appropriate menu option and then press the Return key, click the left mouse button, or press one of the joystick buttons to select activate a menu option.

MAIN MENU

The following options are available on the main menu: Drivers Championship, Challenge, Time Trial, Network Play, Game Options and Exit.

DRIVERS CHAMPIONSHIP

Overview

The Drivers Championship offers we rednecks the chance to embark on a career in excitin' offroad racin'. Beginnin' in Division 4 with a team of amateurs, your aim is to progress through each of the four leagues to reach Division 1 and be crowned Champ-een! Now my cousin Jeremiah tells me that the only way you can achieve promotion from any division is to win it. To help do this you may choose to accept a Team Offer from a higher ranked team. You will however have to complete certain conditions before you are accepted into the new team. Alternatively you can stick with your current team and car. Over the course of a season you will be rewarded with upgrades that'll help improve the performance of your machine, but will this be enough to help you win the division and earn promotion? If not, I reckon' you can always help me clean the still in the backyard.

Sixteen different vehicles (one more than fifteen, one less than seventeen) compete in the Drivers Championship - all with 4 stage upgrades. There are 14 teams battlin' it out throughout the four divisions. Some of the teams compete over several leagues with different cars in each division.

New Championship

To begin a new Championship, simply select this option from the Championship menu (Jus' so you know, there ain't no grits on this here menu). Here you'll also find the Load Championship option. To load a previously saved game, simply highlight this option and then select the required saved game slot.

Name entry screen

When startin' a new Championship you will be prompted to enter your name. To enter your name, move to the name entry box and type in what you wanna call yourself. In case you got some long name like Billy-Bob Clemson Doc Robinson, just Billy-Bob is gonna have to do. Press return to enter your name. Once complete, select continue to proceed to the New Season screen.

New Season

Now I'm not talkin' about deer huntin season, nor possum or turkey's neither. This screen shows the teams competin' in the division and their current rankin'. On this screen you can also access the Championship Rules, outlining the 3 major rules applicable in the Drivers Championship. It is advisable to read through the rules before commencing your season. If you don't abide by the rules, I'm thinkin' Sheriff Buford won't take kindly to that. Select continue to proceed to the Team & Vehicle Selection Screen.

Team and Vehicle Selection

Here you choose the team you want to race for in the forthcoming season. Your selection is limited to the two lowest ranked teams in the division. Once happy with your team and vehicle selection, select continue to proceed to the Championship Standings screen. This screen and process is repeated at the beginnin' of each new division.

Championship Standings screen

This is the main focus point throughout the Championship. You will return to this screen after every race to assess your performance.

On this screen you will find Driver and Team names, current Division, current Season, Points won and other useful information. If you're not in the lead, I reckon' yours and the winner's families can start fuedin'! You can also access the Vehicle Ranking table from here. This is done by moving left or right when the central table button is highlighted. The Ranking table also includes information on current vehicle upgrades, which is useful when deciding whether or not to accept offers from rival teams. The four possible upgrades available are Exhaust, Turbo, Engine and Gearbox.

Team Offers

During the season you are likely to receive Team Offers from other teams. You then have to decide whether or not to accept the offer. Each Team Offer will have various conditions that need to be satisfied before you will be accepted onto the team. Study the conditions carefully before accepting or rejecting a Team Offer. Once one of the Hatfield boys foolishly accepted an offer to join the McCoy team, and was never seen again!

If a team offers you the chance to join them, then a new Team Offers option will become accessible on the Championship Standings screen. Select this option to view the Team Offer. If you accept the team offer, then this option will change to the Check Team Offer option. If you reject the team offer then this option will be removed from the screen until you receive another offer.

When you are on the Team Offer screen you also have the opportunity to view the vehicle you will be competing in should you accept the offer, meet the required conditions and choose to join the team. To do this highlight and then select the Show Vehicle option.

If you do accept a team offer and meet the ree-quired conditions, but then decide that you would rather stay with your current team, don't worry... at the end of the season you are asked to confirm the change of team. Team changes only take place upon completion of a season. If you manage to win the division and gain promotion, this will automatically override any team offers and you will gain promotion to the next division.

Vehicle Upgrades

When startin' out in a new division, your vehicle will not be equipped with any upgrades. However, it's better than racin' around on a tractor. Your team will reward you with upgrades at various stages throughout the season; you will be informed of any upgrades made to your car in-between races. Upgrades to your car will result in a higher rankin', but more importantly will also result in better performance. If you manage to gain promotion to the next division, you will start in a vehicle without any upgrades.

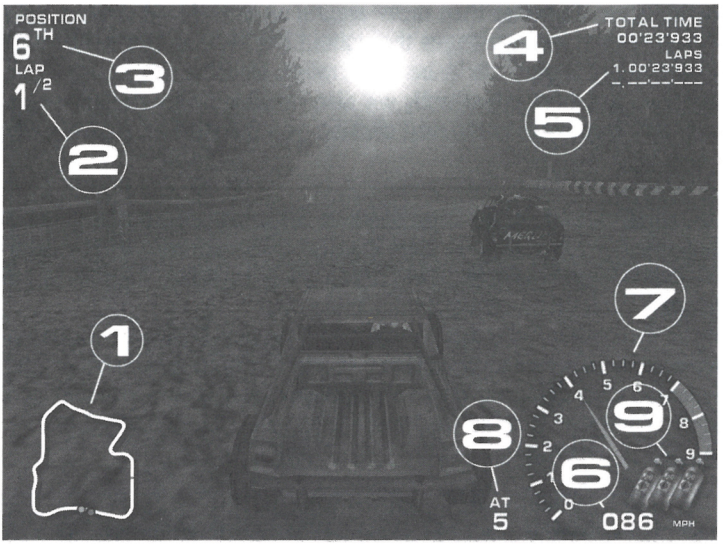

The other options found on the Championship Standings screen are Race; select this option when you are ready to start the next Championship race. Selecting this takes you to the Race Briefing/Loading Screen. While loadin', this screen will display all the relevant information on the forthcoming race.
Save; select this option if you wish to save your current Championship progress (there are eight save game slots available to you). Exit Championship (if you wish to end the current Championship then select this option, you will be asked to confirm this action - remember to Save your game if you want to return to this Championship at a later date.

IN GAME OPTIONS

To activate the in game pause menu press the ESC key. You can then choose to either Resume Race (this will resume the current race), or Retire From Race (this will allow you to retire from the current race). Selecting Retire From Race will mean that you are automatically placed last, gosh darn it. Last time this happened to me I darn near kicked a spittoon through my porch window!

The on-screen display information is there to help you. To change the amount of information shown toggle the H key on your keyboard, there are four different options to choose from.

1. On screen map
2. Lap Indicator
3. Current Race position
4. Total race time
5. Lap update
6. Rev Counter
7. Speedo
8. Gear Indicator
9. Nitro Boosts

Nitro Boosts

Nitro boosts, used wisely, are a very useful addition and can give you the edge over the opposition. At the beginning of each race you will be equipped with 3 nitro boosts. Triggering a nitro boost gives your engine a power increase for 5 seconds. Using a nitro boost is liable to whip the hayseed out from between your teeth, so use caution now, hear?

End Of Race Options

At the end of each race you have access to the post race menu. Here you can choose to Replay the race and relive that glorious last corner, or to see that poor possum you ran over. The following controls are available in Replay: Rewind to start, Rewind, Rewind slow motion, Play, stop, Single step, Slow motion, Fast forward and Forward to end. To quit the replay press the ESC key. To view the other cars during a replay use the F5 key to switch between them. If you do not want to Replay the race, then select Continue and this will return you to the Championship Standing screen.

Championship Notes

There are 6 locations to compete in during the Championship, with 4 different tracks at each location. The different tracks are made available as you progress through the divisions, starting with track 1 in division 4 going through to track 4 in division 1.

On the Race Briefing/Loading screen different race types are displayed, these range from 1 lap Sprint races to 4 lap Endurance races. There are also treacherous Night Time races, which test your drivin' skills to the limit and don't forget the Double Points race, doing well in this race can make or break your season. The final race of the season is a Point-to-Point race around the twisting turning roads of Dead Man's Drop, which brings the Championship season to a suitable climax!

After each race you will return to the Championship Standings screen, where you can check your current position and ranking and save your progress

Good luck in the Championship!!

CHALLENGE

Challenge mode allows you to race on your own against other CPU cars, or against another player in 2 player split screen mode. Initially you will find that only the division 4 cars and tracks are available for selection, but as you progress through the Drivers Championship, more cars and tracks will become available.

Vehicle Select

After entering your name select continue to proceed to the Vehicle Selection screen. Here you choose your preferred Vehicle and Body Style. Select continue to proceed to the Track Setup screen.

Track SetUp

Track Setup allows you to select where you want to race and on which track and also specify the weather conditions and number of laps. Once you are happy with your selection, select continue to proceed to the Race Details screen.

Race Details

Here you have the option to specify the number of CPU Cars and also the CPU Skill level. Note: You can select to race against division 1 vehicles in a Challenge race, even if these vehicles are not actually available to you yet! To begin the Challenge race highlight and select Race.

In Game Options

To activate the in game pause menu press the ESC key, you will then have access to three options. Resume Race (this will resume the current race), Restart Race (this will restart the current race) and Exit Challenge (this will allow you to exit the current race and return to the Main Menu).

End Of Race Options

At the end of a Challenge race you will see the post race results table, showing where you finished and in what time. You will also have access to the post race menu. Here you can Restart the race, if things didn't go as planned! Replay the race (to cycle through the other cars in a Replay press the F5 key) and Exit Challenge this will return you to the Main menu.

TIME TRIAL

Time Trial allows continuous laps on any track at any location and the aim is quite simply to go as fast as possible and beat the current lap record. As with Challenge mode you will find that only division 4 cars and tracks are initially available. The other cars and tracks will become available as you progress through the Drivers Championship. There are no Nitro Boosts in Time Trial. Dang!

Vehicle Select Screen

After entering your name select continue to proceed to the Vehicle Selection screen. Here you choose your preferred Vehicle and Body Style. Select continue to proceed to the Track Setup screen.

Track Setup

In Time Trial mode you only need to select the track location and track number. The weather conditions are set by default. On this screen you can also see the top 5 fastest laps times. Once you are happy with your selection, select Race to begin the Time Trial.

In Game Options

To activate the in game pause menu press the ESC key, you will then have access to three options. Resume Race (this will resume the current race), Restart Race (this will restart the current race) and Exit Time Trial (this will allow you to exit the Time Trial and returns you to the Lap Records screen) Select Main Menu to continue.

Time Trial Notes

The on-screen display is slightly different in Time Trial mode, displaying Current Lap time, Last Lap time and Fastest Lap time.

NETWORK PLAY

OffRoad gives you the chance to race up to 6 players on a local area network. You can join an existin' session or create a new game.

Hosting a game.

Select Network Play from the main menu, you will then be prompted to enter your name; followin' this, select continue. You will then enter the Vehicle Select screen

Vehicle Select

This screen allows you to choose your vehicle and the bodystyle. Select continue and you will enter the sessions screen.

Sessions

This screen will show any sessions that are available to join. To start your own network game select the Create New game button, you will then enter the Track Set Up screen.

Track Set Up

Track Set up allows the host to set the following options: Location, track, race conditions, time of race and number of laps.
Select continue and you will enter the Race Details screen.

Race Details

On this screen you decide if you want to include CPU players as in the race. If you select CPU players any spare places will be made up of CPU players. You also get to choose the skill level of the CPU cars. Select continue to enter the Awaiting Opponents screen.

Awaiting Opponents

This screen shows the race information and also indicates when each of the other players is ready to race. It is the decision of the host when to begin the race. If you select Cancel you will return to the Race Details screen. This will automatically take all the other players back to the Sessions screen where the current game will no longer be selectable

Joining a session

Choose Network Play from the main menu - you will then be prompted to enter your name. Then select continue and you will enter the Vehicle Select screen

Vehicle Select

This screen allows you to choose your vehicle and the bodystyle. Select continue and you will enter the Sessions screen.

Sessions

This screen shows you all the available sessions. Highlight the session you wish to join and you will notice all the relevant race information appear on screen along with an indication of the other players who are waitin' to race. Select the session and you will enter the Awaiting Opponents screen.

Awaiting Opponents

This screen shows all the appropriate race information and the other players waiting to race. The host then decides when to start the race. If you select Cancel on this screen you will return to the sessions screen.

Racing a Network Game

To pause the game during a network race press the esc key on the keyboard. Selecting Exit quits you out and takes you back to the Main Menu; selecting Resume will resume your race, note that you will have only paused your car in the race so expect to have to make up ground.

Once the winner of the race crosses the finish line, the other players competin' in the race will be given 15 seconds to finish too. The game will then automatically finish and the race results will be shown. So get your bee-hind in gear if you hope to see the victory flag!

GAME OPTIONS

Selecting Game Options allows access to the Audio, Video and Controller options screens. These options can then be configured to suit your individual requirements.

AUDIO

The first Audio options screen allows you to alter the Volume, Sample Quality and Output Type. Highlight the appropriate option and then use the left/right cursor keys, the Return key, left mouse button, or one of the joystick buttons to then adjust this option.

There is also an Advanced option, which allows you to fine tune the Audio options. If you do make any adjustments to any of the options and then want to reset the original settings, use the Auto Config button. Note: The game automatically sets the best sound provider available.

VIDEO

The video options allow you to establish the detail level of the in game objects, allowin' you to make the most of the hardware available. The default Video configuration is set to High, the other presets available being Medium and Low settings. If you would like to tweak each effect separately, then use the Custom setting. You can also adjust the Brightness (Gamma) settings from here.

CONTROLLERS

Selectin' the Controllers option from the Game Options menu allows you to reconfigure the default Control settings. To alter these settings select an action and then choose your required key. If at any stage you want to restore the default settings select the Restore Defaults option.

The default keyboard settings are:

Player 1:

Left	Left Cursor Key
Right	Right Cursor Key
Accelerate	Up cursor key
Brake/Reverse	Down cursor Key
Handbrake	Space Bar
Rear View Mirror	Q
Change Camera	Backspace
Gear change up	A
Gear change down	Z
Nitro	N

Player 2:

Left	Numpad 4
Right	Numpad 6
Accelerate	Numpad 8
Brake Reverse	Numpad 5
Handbrake	Numpad 6
Rear view mirror	Numpad 7
Change camera	Numpad /
Gear change up	Numpad -
Gear change down	Numpad +
Nitro	Numpad del

You will also find a number of other options on this screen. You can select Transmission type (Manual or Auto), Analogue Steering On/Off and Force Feedback On/Off.

In order to play Redneck with any other game controller, ensure that the device has previously been installed and is working correctly. If this has been done the device will be shown on the Controller option on the configuration screen. Once selected, set-up the controller as required.
Note: Once you have started this process you will not be able to leave the screen until a key/button has been assigned to each action.

TROUBLESHOOTING GUIDE

1) Driver Problems

The vast majority of problems, which you are likely to encounter, will probably be related to drivers which allow the game to make optimum use of your systems resources. In particular, Redneck is especially influenced by Microsoft DirectX drivers, which are responsible for various aspects of your system including: video, sound, controller input, 3D graphic functions, CD ROM access and other functions. If you do experience problems, always ensure that you are using the latest drivers for these devices, and that your DirectX installation shows these devices as being certified (with DXDIAG). The latest version of DirectX can always be downloaded from http://www.microsoft.com/directx

2) Video problems

Redneck makes use of many of the features which are provided exclusively under DirectX 7.0A. During our testing, we found that some mainly older video cards did not have DX7 compliant drivers and so were unable to play the game without problems being displayed. Please note that simply having Microsoft DirectX 7.0A installed is not sufficient to ensure that the game runs correctly on your system. The drivers for your video card must also be DX 7 compliant or you will experience visual problems. In order to obtain the latest drivers for your video card, please contact the manufacturer of the device.

3) CD ROM Problems

Make sure that the CD ROM disk is in the drive, with the label facing upwards. The CD ROM disk must be in the drive to install or run the game.

Ensure that the CD ROM disk is free from any markings or scratches which may interfere with normal operation. If the disk requires cleaning, gently wipe the surface with a dry, non-abrasive cloth.

If at any time the disk vibrates excessively in the drive, remove the disk immediately and return it to the retailer to be exchanged. The disk may be defective and prolonged use may damage the CD ROM drive.

4) Sound Problems

Make sure that your speakers or headphones are plugged into the correct socket, and that the volume control is at an appropriate level. Ensure that the speakers are switched on.

If you continue to experience problems, ensure that the Volume Control taskbar icon (depicted by a small yellow speaker) is present. Double-clicking this icon will open the Volume Control window. Make sure that the Wave and Master Volume controls are set at an appropriate level and that the Mute feature is not enabled.

Redneck makes use of 3D positional sound if your sound card supports it. However, in order to experience this, you will need to have suitable speakers which have been correctly positioned, and the sound card will also need to be aware of your speaker orientation. If you are not sure about this and you would like to make use of this feature, please consult the documentation which was supplied with your sound card and speakers.

Technical Support

INSERT INTERPLAY TECHNICAL / CUSTOMER SUPPORT HERE

INTERPLAY LIMITED 90-DAY WARRANTY

Interplay warrants to the original purchaser of this Interplay Entertainment Corp. product that the compact disc or floppy disk(s) on which the software programs are recorded will be free from defects in material and workmanship for 90 days from the date of purchase. IF the compact disc or floppy disk(s) is found defective within 90 days of original purchase, Interplay agrees to replace, free of charge, any product discovered to be defective within such period upon receipt at its factory service center of the product, postage paid, with proof of the date of purchase. This warranty is limited to the compact disc or floppy disk(s) containing the software program originally provided by Interplay and is not applicable to normal wear and tear. This shall be void if the defect has arisen through abuse, mistreatment, or neglect. Any implied warranties applicable to this product, including warranties of merchantability and fitness for a particular purpose are disclaimed. Interplay disclaims all responsibility for incidental or consequential damages.

Some states do not allow limitations as to how long an implied warranty lasts and or exclusions or limitations of incidental or consequential damages so the above limitations and or exclusions or liability may not apply to you. This warranty gives you specific rights, and you may also have other rights which vary from state to state.

LIMITED WARRANTY

If the compact disc or floppy disk(s) should fail after the original 90-day warranty period has expired, you may return the software program to Interplay at the address noted below with a check or money order for $5.00 (U.S. currency), which includes postage and handling, and Interplay will mail a replacement to you. To receive a replacement, you need to enclose the original defective compact disc or floppy disk(s) in protective packaging accompanied by: (1) a $5.00 check or money order, (2) a brief statement describing the defect, and (3) your return address. If you have a problem with your software, you may wish to call us first at (949) 553-6678. If your compact disc is defective and a replacement is necessary, U.P.S. or registered mail is recommended for returns. Please send the defective disc(s) only (not the box) with a description of the problem and $5.00 to:

Warranty Replacements

HINT LINE

Stumped?!?! Frustrated?? Stuck?? Or do you just want to know the latest codes and tricks for this and many other Interplay titles?? Well, look no further because the solution for all these problems is just a phone call away. Pick up the phone and call the Interplay Hintline at 1.900.370.PLAY<7529> (or 1.900.370.6869 for all our Canadian friends).

You can call this line 24 hours a day, 7 days a week. And best of all, it only costs 95¢ a minute (again, for our Canadian friends this charge will be in Canadian dollars), with all long distance charges included in that price... you can't beat that for a great deal. Remember, you must be over 18 or have your parent's permission to call the hintline. You must have a touch-tone phone. This service is only available in the U.S. and Canada. Charges and information are subject to change without notice.

Interplay Website

Welcome to the Interplay Web! As a company dedicated to providing innovative, high-quality interactive entertainment software, we are always striving to stay as close as possible to the leading edge of technology. This Web site is the latest example of our ongoing effort to provide a wealth of information and opportunities to you. As a company of fanatic gamers, we love the idea of gamers all over the world tapping into cyberspace to see, touch and feel our latest games. No hype, no marketing campaign; just great games. To make it work, our goal is to keep this site fresh and new, to make it a place where you can tell US what you like about our games... and what you don't like about them. So use the feedback options on these pages and sound off. Enjoy your visit in our Web site, explore all the different areas we have to offer, and come back soon. Check us out in the weeks and months ahead; we will be introducing new and exciting areas for you to experience.

Once again, welcome.
Brian Fargo, C.E.O.

Interplay's World Wide Web site is an Internet service designed to give you the latest information about Interplay and our products. This site features our demos, upgrades, product information and ordering information. This website is not intended for technical support, but to offer new machines and the latest product information. For technical support, please contact Interplay as described in the Technical Support section.

Interplay Web Store

Looking for a quick, easy way to get your favorite Interplay games? Well, look no further...you can now order directly from Interplay. Just turn on your computer and go to... www.interplay-store.com. This is your one-stop shop for everything Interplay. Buy the hottest new releases or maybe get a copy of that hard-to-find game that you've been looking for. Purchase some ultra-cool merchandise; or make a bid on a unique collectible in the Online Auction. All this, seasonal specials and much more. So don't delay... go to www.interplay-store.com and get shopping!
