

Hi there,

thanks for downloading the bonus content for Cyberlinxxx.

Folders contain artworks from all the years I've been working on the visual novel.

None of these 242 renders are canon and were made not just for fun but to improve my rendering skills as well(posing, lighting, expression etcetc).

There may be things that you will notice have changed over time like Trish's nose or the skin reworks happening in 2023 or the post processing.

I decided to offer these as originals and not apply any postwork to the older ones because they show the ever changing flow of a developing process.

Image resolution ranges from HD to 4k and different file formats.

Have fun
