ANGELGAZE DEMO
---
* This demo ends when Kian and Joanna jump over to Cherry Jet. It won't let you save then.
* There may be story and/or interaction changes in the final release.
* Saved games will not be compatible with further releases (even new updates to the demo)
* FEEDBACK AND BUG REPORTS ARE WELCOME!

TROUBLESHOOTING
---
* There may be issues with linux, AMD, OpenGL and Intel HD Graphics... if you run the game and you hear the music but the screen is black, press ALT-S to disable the in-built shaders. Or run the EXE with -no-crt-chroma as argument
* If you get very low FPS (like 2-3 FPS) your PC may not be fast enough for Reshade shaders (different from the in-built ones). Deleting the file dxgi.dll will remove Reshade and boost your frame rate drastically

SPECIAL KEYS
---
* Right clicking on an object will activate the "default verb" (ex for people it's Talk To)

M - OPEN CHAPERONE MANUAL (ONCE OBTAINED, IF ALLOWED)
Same as "Look at manual" (in inventory)
T - THINK (WHEN SOME FACTS HAVE BEEN DISCOVERED, IF ALLOWED)
Same as "Think" verb or clicking the flashing T key at the top right when shown

V - QUICK SAVE (saves as slot 1)
F3 - SAVE GAME
F4 - RESTORE GAME
SPACE BAR - PAUSE GAME
ESC - SKIP DIALOG (Skips through dialog very fast if you hold it down)

ALT-1 Smallest window
ALT-2 Small window
ALT-3 1920x1080 full screen exclusive mode (recommended)
ALT-4 1920x1080 full screen windowed

If you have a 4K screen setting to full screen and then ALT-ENTER could yield the best size (a 1920x1080 window)

ALT-W STRONG OR WEAK SCAN LINES
Strong usually suggested but produce some moire
ALT-S REMOVE CRT AND CURVATURE FILTER (RESHADER FILTERS SUCH AS VHS EFFECT/COLOR BLUR REMAIN)
Not recommended, CRT looks better
ALT-B BLACK AND WHITE MODE
What is this even here for
