1.0 How to quit the game

At any point in the game you can exit the game by holding down the 'Ctrl' key and pressing 'Q'.

2.0 About task-switching in Windows

On some PC configurations, it is recommended that you avoid using Alt-TAB to switch to & from the windows desktop while playing this game, as graphical corruption may occur which is harmless but would require the game to be restarted. As such it is also recommended that you disable your Windows Screen Saver and any other background applications while playing the game.

3.0 Controls

3.1 Joystick Control

Joystick Movement	Ships Movement
UP	DOWN
DOWN	UP
LEFT	LEFT
RIGHT	RIGHT
BUTTON 1	ACCELERATE
BUTTON 2	FIRE
ADDITIONAL KEYBOARD KEYS	SELECT WEAPON

The accelerate, fire and select are configurable from the configuration controls screen.

3.2 Keyboard Control

Keyboard	Ships Movement
CURSOR UP	DOWN
CURSOR DOWN	UP
CURSOR LEFT	LEFT
CURSOR RIGHT	RIGHT
SPACE	ACCELERATE
ALT	FIRE
CTRL	SELECT WEAPON

On certain keyboards holding down a set number of keys causes a keyboard error to occur. If this happens on your keyboard you will hear a short beep from the PC speaker. To rectify this simply redefine the keyboard controls to use a different set of keys. All of the keys are configurable from the config controls screen.

4.0 Camera Controls

During the race, fly-through and demos of other tracks you can change camera views using the function keys as follows:

F1 - Cockpit, F2 - Chase, F3 - Rear, F4 - TV, F5 - Free

When using the "Free" camera you can view your ship from any angle and distance by using the Ins, Del, PgUp, PgDn, Plus and Minus keys on your numeric keypad to move the camera around.
