VR Harem Life Instructions

1. How to Operate

2. Possible Operations

◯ The character's body can basically be grabbed anywhere and moved.

* If the character's mode is "Motion w/o Gravity" (motion without gravity), you can only grab the character by the waist and move the character's entire body.
* If you grab breasts, the character does not move, but you can rub her breasts.

◯ Bring (your) mouth close for kissing and sucking tits.

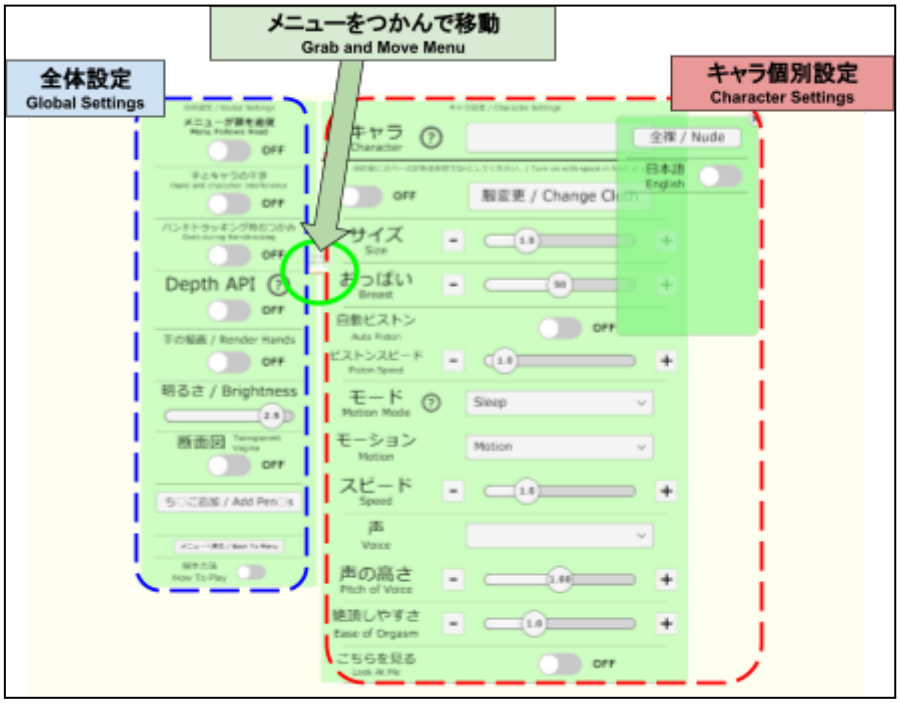

◯ Penises can be inserted into the character's mouth and pussy.

◯ Other operations that can be performed on the operation panel are described in the next chapter.

3. Operation Panel

The menu position can be fixed by turning off the "Menu follows the head" switch.
The menu can be moved freely by grabbing the white capsule in the middle.
We have received many questions on this point, so we have described it separately.

a. Left side = Global Settings

- **Menu follows head**
  Whether the menu panel automatically moves in front of the player.
- **Hand and character interference**
  Whether the player's hand passes through the character's body.
- **Grab during Handtracking (Quest 2, 3 only)**
  On/Off of the function to grab characters and objects during hand tracking mode
- **Depth API (Quest3 only)**
  On/Off of Depth API function
- **Render Hands (only when Depth API is On)**
  Turning on/off the drawing of the player's hand model
- **Brightness**
  Set the brightness of the VR space.
- **Transparent Vagina**
  Turn on/off the Transparent Vagina function when penis is inserted into the character's pussy.
  *This is a common setting for all characters, not individual settings for each character.
- **Add Penis**
  When you press the button, Penis will be added.
- **Back to menu**
  Return to the menu scene.
- **How To Play**
  Display the operation method panel.

b. Right side = individual character settings

- **Character dropdown**
  Select the character you want to configure.
  The bottom panel changes for each character.

- **(Top left) On/Off switch**
  Set the character display/hide.
- **Clothing change button**
  Show/hide the clothes change sub-panel.
- **Size slider**
  Set the size of the character itself.
- **Breast slider**
  Set the size of your character's breasts.
- **Automatic piston**
  Set whether or not the penis pistons automatically when the penis is inserted.
  (Common to mouth and pussy)
- **Piston speed**
  Sets the automatic piston speed.
- **Motion Mode**
  Set the character's movement mode. Details of each mode are below.
  ・**Sleep**: Sleep mode, the character does not move and all limbs follow gravity.
  ・**Awake**: Wake up mode, basically the same as sleep mode, but open their eyes and look at you.
  ・**Motion w/ Gravity**: Motion mode with gravity, characters move on their own. Due to gravity, the entire body falls to the ground.
  ・**Motion w/o Gravity**: Motion mode without gravity, character moves on their own. Since gravity does not work, you can move the character's position freely. The ability to grab their body is gone, and you can only move your entire body by grabbing their waist.
- **Motion**
  Valid only during motion mode.
  Set the character's motion.
- **Speed**
  Set the speed of the character's motion.
- **Voice**
  Set the character's voice.
- **Voice pitch**
  Set the pitch of the character's voice.
  If you set it high, it will be a loli voice, and if you set it low, it will be a mature voice.
- **Ease of Orgasm**
  Set the ease with which the character's climax parameter increases.
  If set to 0, the character will not climax.
- **Look At Me**
  Sets whether the character looks into the player's eyes.
