Vindicator
Uprising

Centuries ago, they appeared. Seizing power and taking control. Those who did not bargain or plead were wiped out. Mankind lived under the rule of "The Angels".
One man, with access to secret knowledge, must battle "The Angels" to reveal the truth. Only perseverance will lead to triumph, and the end of their dominion.
You truly are…A Vindicator.

Story and objective

An organization called "The Order" rules the world in league with the Angels, a mysterious race of beings.

In Vindicator: Uprising you play the special agent who turns against them and leads earth's resistance against the The Order and The Angels.

System requirements

The game has been tested on the following Windows versions: Windows XP, Windows 7 and Windows 8 and should work on any computer with a decent video card.

Controls

There are two keyboard layouts available, to enable movement with either the right or the left hand.

Arrow left or A	= Run left
Arrow right or D	= Run right
Arrow up or W	= Ladder up
Arrow down or S	= Ladder down or dodge
Z or K	= Jump
X or L	= Fire
Esc or P	= Pause/quit
F	= Toggle full screen
Backspace	= Stretch full screen
T	= Toggle music

Controls for gamepad

This is only tested on a few gamepads and can vary depending on which gamepad you are using. This might therefore not work with your gamepad.

Axes left, right, up down for moving, on some gamepads D-pad left, right, up, down also work.
Button1 for jumping and button2 for shooting.
Button3 for dodge.
Also on some pads, right shoulder button to shoot and left shoulder button to dodge.

PASSWORDS

You will get a password after completing each level, this password will be different depending on how many extra healthpoints you have collected. The password will be shown on the level map after completing a level, and will also automatically be saved to the password input on the title screen. When you get "game over" you can retry that level an unlimited number of times, but when you retry or when you start playing from a password your score is reset. You can enter any password you have gained under "password" on the title screen.

ACHIEVEMENTS

You can get three types of achievements on each level: time bonus, no damage bonus and perfect run bonus. You get the time bonus if you finish the level on a set time. You get the no damage bonus if you finish a level without taking any damage. You get the perfect run bonus if you get the time bonus and the no damage bonus in the same run on a level. There are also other more difficult achievements to collect. You can learn more about these and watch your achievement progression on the title screen under "achievements". This is also where you will find the hall of fame (hi-score).

CREDITS

A big thanks goes to all the play testers, we really appreciate your help! Hope you all enjoy the game!
