BOCCE REVOLUTION

How to throw the ball

PRECISION THROW

It's used when you want with your ball to approach slowly the red small ball (pallino).

STRONG THROWS

They are used to hit one or more balls with the aim to move their position far from the previous point. You can hit your balls and/or the opponent's balls and/or the red small ball (pallino), it depends by your tactics of play. You can select 3 strong throws:

ABOVEHAND

It's a straight throw. The thrown ball rolls for a long distance from the point where it hits a ball.

UNDERHAND

It's a straight throw. The thrown ball rolls for a short distance from the point where it hits a ball.

INTO THE AIR

It's a throw with a curved trajectory into the air. It's used when the player wants to hit a ball with a line of sight covered by other balls.
