EPILEPSY WARNING

Certain individuals may experience epileptic seizures or loss of consciousness when subjected to strong, flashing lights over longer periods of time. Such individuals may therefore experience a seizure while operating computer or video games. This can also affect individuals who have no prior medical record of epilepsy or have never previously experienced a seizure. If you or any family member has ever experienced epilepsy symptoms (seizures or loss of consciousness) after exposure to flashing lights, please consult your doctor before playing this game. Parental guidance is always recommended when children are using computer and video games. Should you or your child experience dizziness, poor eyesight, eye or muscle twitching, loss of consciousness, feelings of disorientation or any type of involuntary movements or cramps while playing this game, **TURN IT OFF IMMEDIATELY AND CONSULT YOUR DOCTOR BEFORE PLAYING AGAIN.**

Precautions during use:

- Do not sit too close to the monitor. Sit as far away as comfortably possible.
- Use as small a monitor as possible.
- Do not play when tired or short on sleep.
- Make sure that there is sufficient lighting in the room.
- Be sure to take a 10-15 minute break every hour.

TUTORIAL

Get the nuts and bolts of the game by exploring the tutorial. To start the tutorial, enter the Tournament Menu.

TOURNAMENT

Drive your way to the top in a single player campaign! The tournament gameplay is divided into leagues. To progress through a league, finish all its events. Events are composed of one or more tracks, completed in the same game mode using the same set of mutators. To complete a single event, finish the race in 1st, 2nd, or 3rd position. Completing a league earns you new paint jobs, vehicle parts or driver suits. You can track your professional progress by collecting career titles.

GO OFF-ROAD

Tired of the beaten track? GO OFF-ROAD and create a race that best suits your needs. Create, modify, and race just as you like.

Select **TIME ATTACK** to compete against time - it's just you and the track with the clock ticking hot on your wheels. TIME ATTACK also allows you to activate a ghost (yours or a developer's).

NOTICE: *Player's ghost is only available after finishing a given track during the current game session.*

With **QUICK EVENT** you can pick and choose elements to make a race of your own.

Customize game mode, track and mutators anyway you want. Be sure to explore all the options!

In **CUSTOM TOURNAMENT** you can set up a Tournament from your favourite tracks. Each race earns you points. Whoever has the most after the last race wins.

GAME MODES

Nail'd offers four different game modes to choose from.

SIMPLE RACE

The first player to the finish line simply wins.

TIME CHALLENGE

Make your way from one checkpoint to another within the designated time limit.

STUNT CHALLENGE

In this mode, Boost Feats are rewarded with points. The player with the highest number of points wins the challenge.

NOTICE: *When the first player crosses the finish line, the points of the other players gradually decrease.*

FREE RACE (available only in multiplayer mode)

Set the time limit. The best lap time wins. Restart the lap whenever you need to make the most of the time left.

In this mode, you won't get smashed by other players.

Before contacting technical support, please make sure your operating system (Windows) and device drivers (video card, sound card & motherboard) are fully up to date, as this is usually the main problem when experiencing software difficulties. Please also make sure you have read the installation instructions fully. When submitting an error report to our help desk, please include the following information.....

- Exact error message, if any.
- Steps taken to reproduce the error/fault.
- Details of programs running at the time of the error, including anti-virus and firewall applications.
- Most importantly, email us a DirectX Diagnostic report.

Do this by following the below instructions:

Click the START button on your Windows task bar, then click RUN and type 'dxdiag' in the box that opens. The DirectX diagnostic toolbox should run automatically. This tool provides details for your whole system, and the details can be dumped to a log file by clicking on the "Save All Information" button at the bottom. This will save a text file called "DxDiag", which you can simply attach to any email correspondence. This information will best assist us in resolving your query as quickly as possible.
