

MIBIBLI'S QUEST

===== CONTROLS =====

Arrows, Z, X, and (later on) C
(& you can use W or Y for if you're on an AZERTY OR QWERTZ
keyboard)
To use a gamepad, you need an external program such as Joy2Key.

===== FOR RETURNING PLAYERS: =====

If you have NOT played the game before, then don't read this and
just go enjoy the game! If you've already played the earlier
version, then read below to learn what new content there is.

----- So what's added in the paid version and how do I get to it???

----- New "final boss!!!"

To access it, look around for some new things near the end of the
game -or- skip to the cheats section of this page.

----- New "Insanity Shuffle" difficulty!

Unlocked by beating the game on "Mibibli" difficulty. If you've
already beat the game on that difficulty, then just load the game
and walk to the end again and rewatch the ending. -OR- if you
haven't beat the game and want it anyway, then skip to the cheats
section of this page.

----- A bit of other stuff:

A new alternate ending and stuff?

BUT, BUT, BUT THE GAME IS WAY TOO HARD! I COULDN'T GET ANYWHERE!

Added in all new versions of Mibibli's Quest is a new hidden cheat that gives you invincibility to everything but spikes and pits, you can now freely explore the most of the game. To learn the cheat, skip to the cheats section of this page.

DO MY SAVED GAMES TRANSFER TO THE NEW VERSION?

YES!
But remember that since the game uses Flash, if you delete your computer's Flash cache then you'll lose your progress.

=====

CHEATS (SPOILY SPOILERS!?!?!)

=====

"FINAL BOSS"

(NOT ACCESSIBLE IN FREE VERSION)

When you beat the game, there's a somewhat hidden code that gives you access to the final boss. Each letter corresponds to an arrow key (up/down/left/right), press the keys in order on the title screen. This is actually the normal/only way to access the boss, but here you can get the code without looking for it in-game. Here's the code:

UDD LRU LRD
DRU LRD UDU

INSTANTLY UNLOCK "INSANITY SHUFFLE" DIFFICULTY

(NOT ACCESSIBLE IN FREE VERSION)

Start a new game. On the difficulty select screen, put the game's cursor over "insanity shuffle." Simultaneously press left, right, and C. If you have the paid version of the game, the difficulty mode will be temporarily unlocked for you to start a new game in.

----- INVINCIBILITY -----

Start or load any game in the "double easy" difficulty. When you have control of Mibibli, press and hold left, right, and C for at least 10 seconds.
