Visuals and Quality Settings:
The game is designed to run at 16X9 aspect ratio!
Initial quality setting dialogue:
- Scooter: textures are half the resolution, no antialiasing, no vsync
- Streetfighter: full quality graphics, no antialiasing, no vsync
- Superbike: 4X Multi Sampling antialiasing, vsync

Ingame visual effects settings (toggle with esc on main menu):
- FAST: original poligon graphics, no extra effects
- MEGA: depth of field, vignetting, chromatic aberration, lensflares, bike headlight, etc.

Controls:
Steer with arrow keys or d-pad on the 360 controller
Shift up with up arrow or X on the 360 controller
The xbox 360 controller works on windows only!

UBUNTU: disconnect the 360 controller before running the game!
