RGBVERSE
QUICK REFERENCE

IF you **THINK** you are a hardcore gamer...

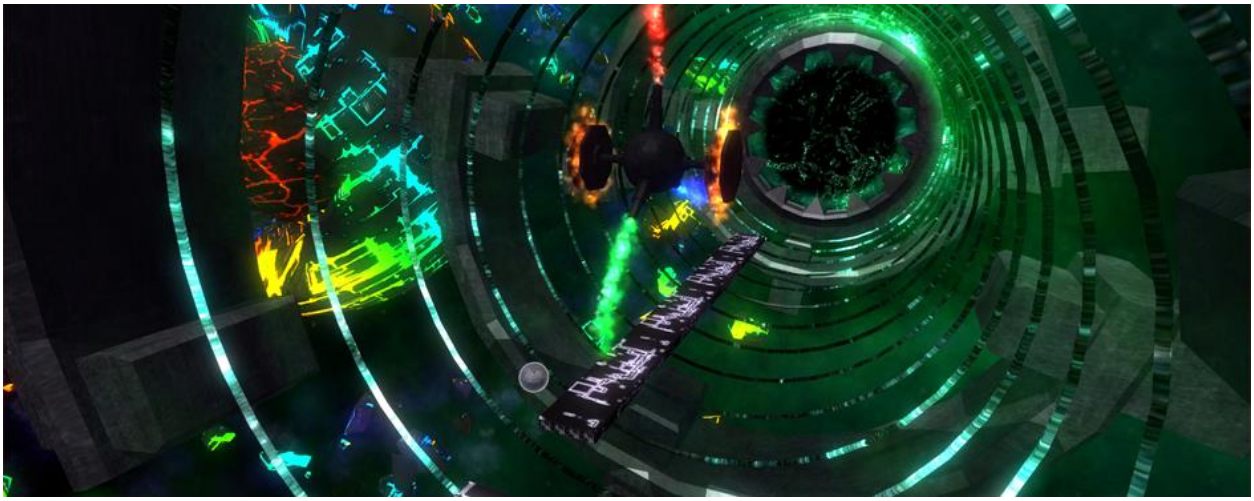

IF you **THINK** you know what it means to use your skills...

IF you **THINK** your reflexes are up for the task...

IF you **THINK** you are up for the challenge...

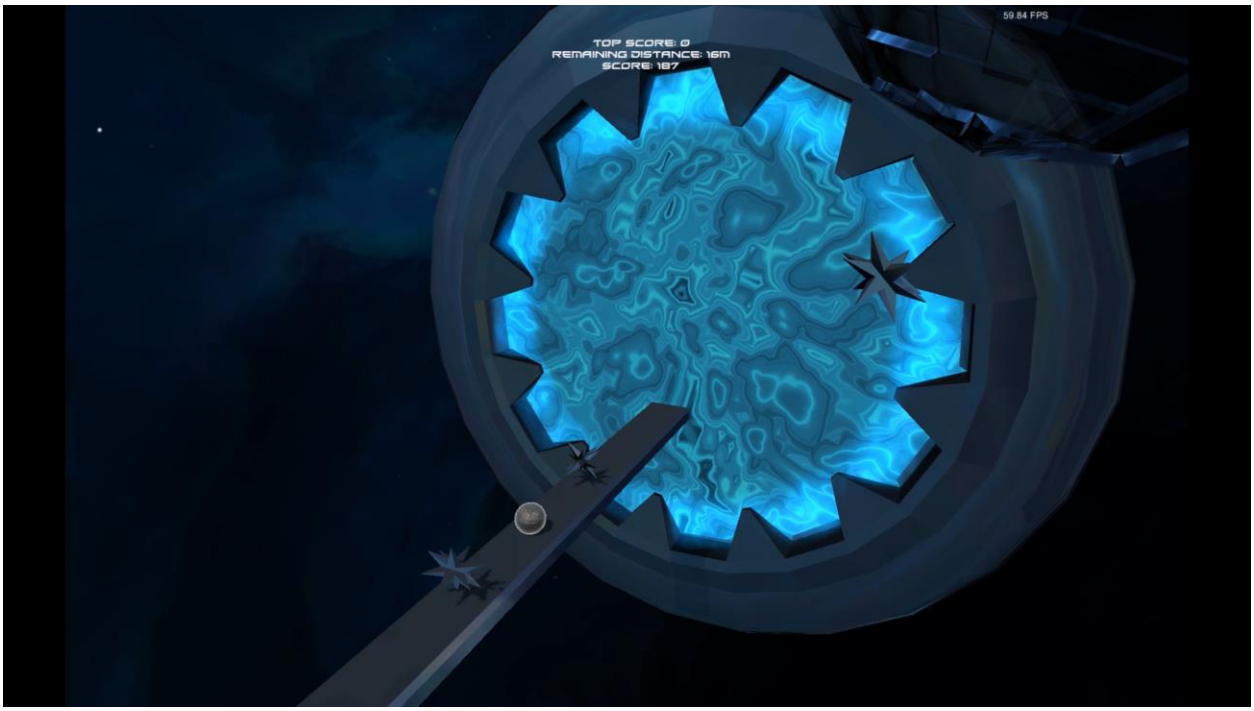

... Then it is time to play **RGBverse**.

RGBverse is a Sci-Fi constant roller platform arcade with beautiful 3d graphics, non-stop action and captivating music. It will hook you within minutes and is bound to sharpen your reflexes.

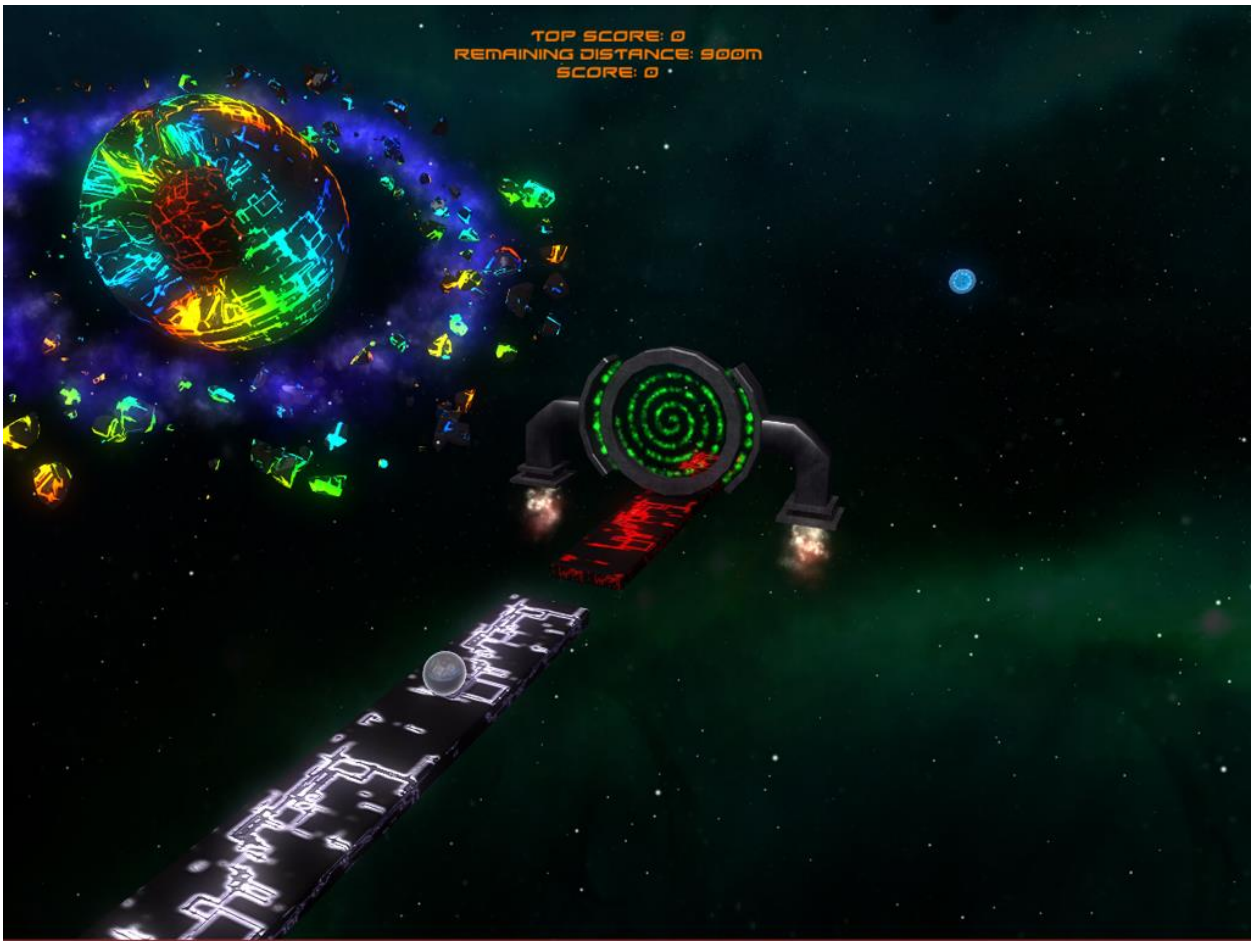

A taste of the graphics

You control a spherical, photonic entity from an alien universe. Your mission: explore other universes and overcome everything that wants to prevent you from reaching your goal: the NanoGates, powerful teleporting portals.

Just before the NanoGate

You can switch between the three basic colors: **Red, Green** and **Blue.** By switching colors, you match your light wave harmonic emissions to each enemy's and obstacle's color, making it possible to pass by.

How quick can you switch colors? Hint: you have to do it mid-air!

Use your skill to get through the multitude of traps and enemies that are waiting for you.

Don't fall down!

* You will encounter things like...
* Colored energy platforms and rings
* Robotic enemies coming after you
* Various weapons shooting at you
* Non-linear gameplay
* Intense non-stop action
* 4 different game speed settings
* Boss fight

Are you ready for a **BIG** challenge?

Now, this will keep you busy!

So, what are you waiting for?

Switch your color and **JUMP**!
