The newest version of Strategy & RPG !

Combining strategy and rpg types from the most popular types of game history, ready to get a whole new look for Pocket Universe.Core steel game studios vision is not world which is around the player, already pocket universe has world which is supported with artificial intelligence, players will find ourselves middle of this world. The story of the Pocket Universe is that the adventure of a human-created universe after the troubles in the world is about continuing the human race on this new planet named "MA010414". Pocket Universe, based on the theory of pocket universe in it's story and developed with the Unity game engine, It will be presented pre-order on July 14th, early access on From 30 August to 30 September to the likes of game enthusiasts. Users will reach to full version of the game earliest in a year, lately two years .

STORY

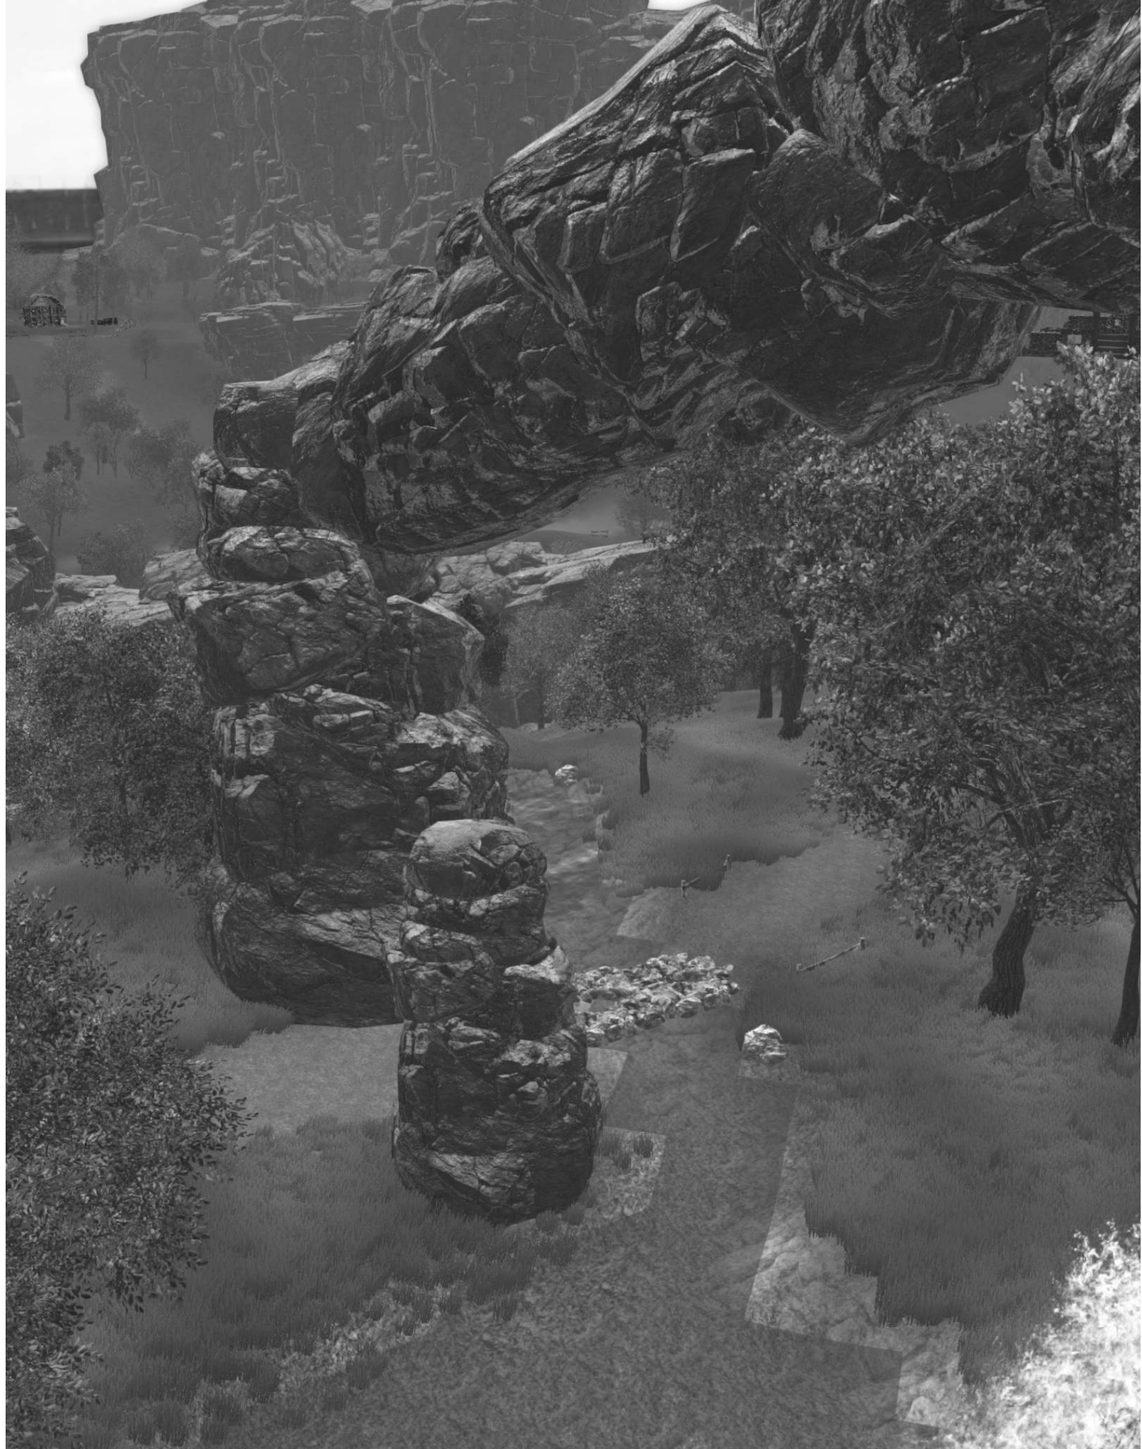

08

The United Nations has gathered a team of the worlds foremost scientists. The task of the team was to do experiments on the theory of relativity. Experiments have begun to give results that no one ever expected. And scientists succeeded in creating an incredible invention, They managed to create a pocket universe but it was small. With this end result of United Nations officials, they wanted to stop the other experiments and only work on the pocket universe experiment. The work went great, and even though there were small differences, they managed to create a similar universe to our universe.

09

Now the universe was ready for what it was used for. Members of the United Nations believed that the pocket universe was safe and convenient for conducting secret and important research and experiments. Hundreds of people and their equipment have been sent to the Pocket Universe. Work continued for ten years. Something must have gone wrong in the pocket universe that the United Nations announced that the whole team lost their lives in a plane crash. What happened in the Pocket Universe was hidden in the secret files of the United Nations. And the entrance to the pocket universe was sealed not to open again.

Closing Day

Ten Years later

An emergency call was made to Earth after the unidentified explosion of Macca Dynamic Underground Experimental Center. According to Macca Dynamic MA010414 Presidents statement, all connections were disconnected after one hour from the emergency call and the gate was not working. The team, which was disconnected from the world, lived for two years according to the emergency rules. Emergency rule has the highest competent authority in accordance with the companys team and everything is on his control. In these two years the division under the presidents team has begun. It was the workers who started the first riot, then scientists and soldiers.

Crying Womens War

In the third year of the intervention, groupings became more and more nervous. The president of the company separated a working class woman from her husband and threw her husband into the cell. This movement initiated the rebellion of workers. This is why the war is called Crying Womens War. After the rebellion, 4 main groups emerged. President and servants The Kingdom, soldiers Five Commandos, scientists People of Tomorrow, workers Retro Masks they called. After five years in the fighting, the president died and his son take the place of president after the groups began to approach each other more positively. The peace agreement came when they convinced the thousand people dead will be danger of the population.

FACTIONS

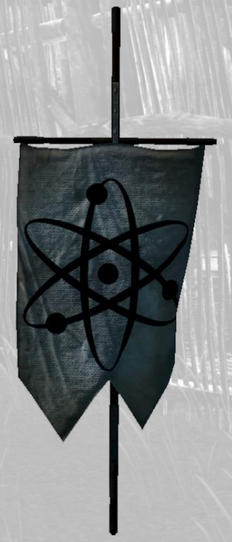

THE KINGDOM

Kingdom is a community managed by monarchy. It has a better commodity asset than other groups, but with a population that is lower than the others, it causes them to pursue an outward- closed policy. Only those who can enter the territory with special permission can not be allowed to be executed directly. The names of the special troops are the kings guards who say they are the best soldiers ever, but it is only legendary because there is no one to see and live before...

PEOPLE OF TOMORROW

Tomorrows people are the most advanced technology group established by scientists. They have one of the most beautiful and peaceful places in the world. This community living in a single advanced age is the community that has the best protected and single metal walls for this reason. Since the war, none People of Tomorrow have died. Robot soldiers are not as intelligent as a man, though their weapons are deadly

RETRO MASKS

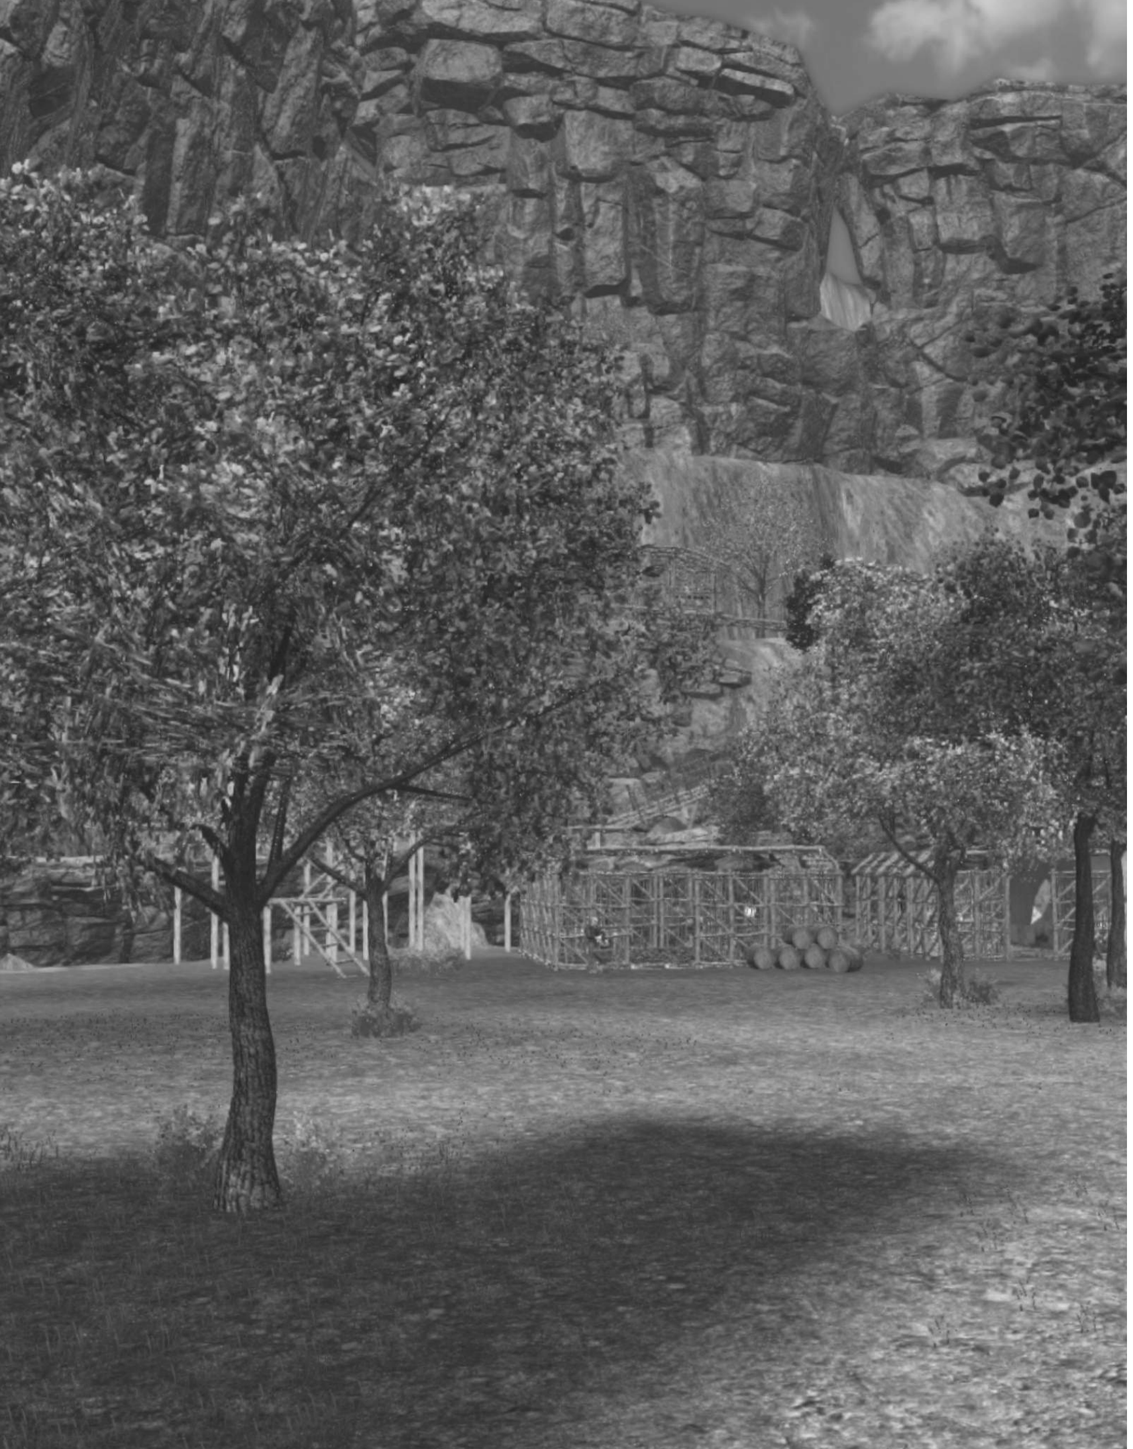

Retro Maskels is a working-class community of Macca dynamic. It is the group that rebelled and the first spark of the war. In the crying womens war, they lossed of half of their population but now community is the highest population pocket universe. Although peace treaty signings can not be negotiated with Kingdom people. All retro masked soldiers wear masks to remember and remembers their supporters who died from gas bombs thrown by the kingdom in the aimed crying womans war. Although they have the most population, they are the poorest community in the pocket universe, livelihood with animals and farming. There is no special military unit but in the war they say thats the Retro Masks who killed the president...

FIVE COMMANDOS

Five commandos are the name of the union of the security forces working at five different facilities of Macca Dynamic. Every presiding president was elected and these five soldiers led this coalition. Since the war, management has the same shape. The ancestor was army has made them the best soldiers in the land. It has an average population and every child born in the Five Commandos is a soldier candidate. The name of the special troops is the ghost soldier who killed the most people at the time of the Crying Womens War. Thats why everybody who approaches the Five Commando lands will think twice.

COINCIDENTAL ARTIFICIAL INTELLIGENCE

A.I.

With our self-developed artificial intelligence, in every new game is different game. Relations between communities are completely random, relationships between NPCs are random.You will have different enemies and friends in each new game.Every move you make and artificial intelligence will affect all relationships.Unfortunately main tasks remain static.

WHY EARLY ACCESS?

Pocket Universe is a one person project. We budget are a limited. But we have big ideas. Early access, big chance for us. Project is a big but it’s not enough we will work harder. My wish, build a big company because of this reason we need more complicated and new type games. We offer you play strategy game like as rpg. And more two different game for future (one game is a medieval template). You help us and we offer you more and better quality games.
