How to Play

Citadale
The Legends Trilogy

Controls
Move your character with the gamepad or the keyboard. There are only three basic control functions: Moving, Jumping and Attacking.
On the gamepad both the D-Pad and the analog sticks are supported. The keyboard controls are either the ARROW keys or WASD keys. C, V, CTRL, ALT and SHIFT are used to jump and attack.

Items
Smashing candles will release the item hidden inside.
Just walking into an item will collect it.
There are four types of items: Soul Gems, Coins, Health and Subweapons.

Soul Gems
They are used as ammo for your subweapons. Each subweapon needs a different amount of Soul Gems. If you don't have enough, you can't use the subweapon. They come in SMALL and LARGE.

Coins
These may or may not be used to unlock a bonus secret in Chapter 1.
Unlike Soul Gems, Coins carry over when you die or complete a level.

Health
This tasty piece of meat restores some health. Why you would put a strange piece of meat in your mouth is none of my business, tho.

Subweapons
Press UP and Attack to use it. You can only have one at a time and each subweapon requires Soul Gems to use.
There are four: Holy Water, Throwing Star, Axe and Potion.
