Gameplay Tutorial

Mission : Reach destination with predicted Block Count

1. Open Quick Tips (Short clues as hints)

2. Read Hint1, Hint2, Hint3 (Hint3 is paid one)

3. Form yourself a question using the hints

4. Guess the answer (Numeric), that's your Block Count

5. Alert!!! The block you start is the Block 1 (Counted as Block Count = 1)

6. Move through the blocks with your guessed number as the number of block to finish.

7. Destination Block is not counted as Block Count

8. Reach the destination with the exact Block Count you predicted

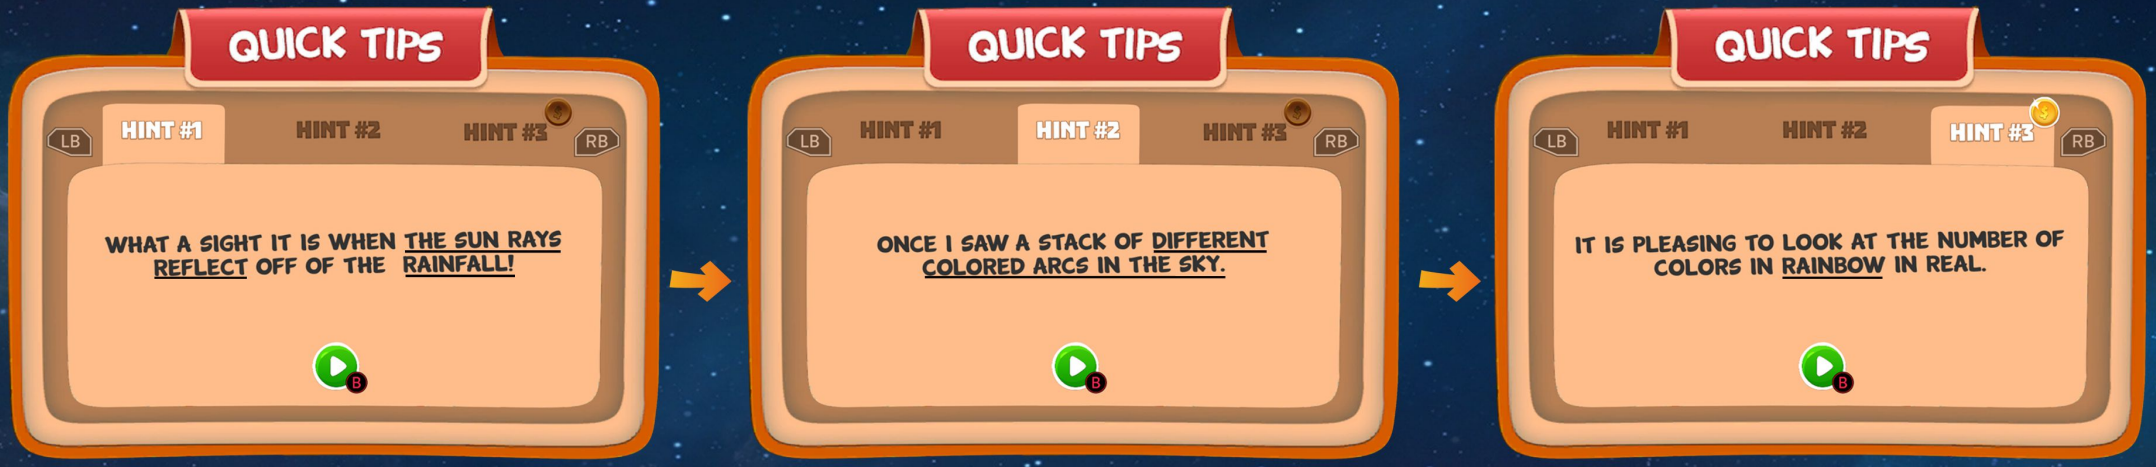

9. If your predicted Block Count is correct, you will move on to the next stage

10. If your predicted Clock Count is wrong, you will have the redo the last stage

Example Page_1

Quick Tips boxes are the short clues for guessing the answer for the level

Quick Tips will open itself after 3 seconds or on click or press X

Hint 1 : Least Info

Hint 2 : Guessable info

Hint 3 : Easy one
but paid by Game Coins

Underlined words are the hints to form the question

Example Page_2

The Sun rays reflect + Different Coloured Arcs in the sky + Rainbow

↓

Let's form a question

↓

" How many colours in a rainbow "

↓

Let's find out the answer which is pretty much a numeric value

↓

Rainbow appears in seven colors. So Answer is 7

↓

So 7 is the Block Count

Example Page_3

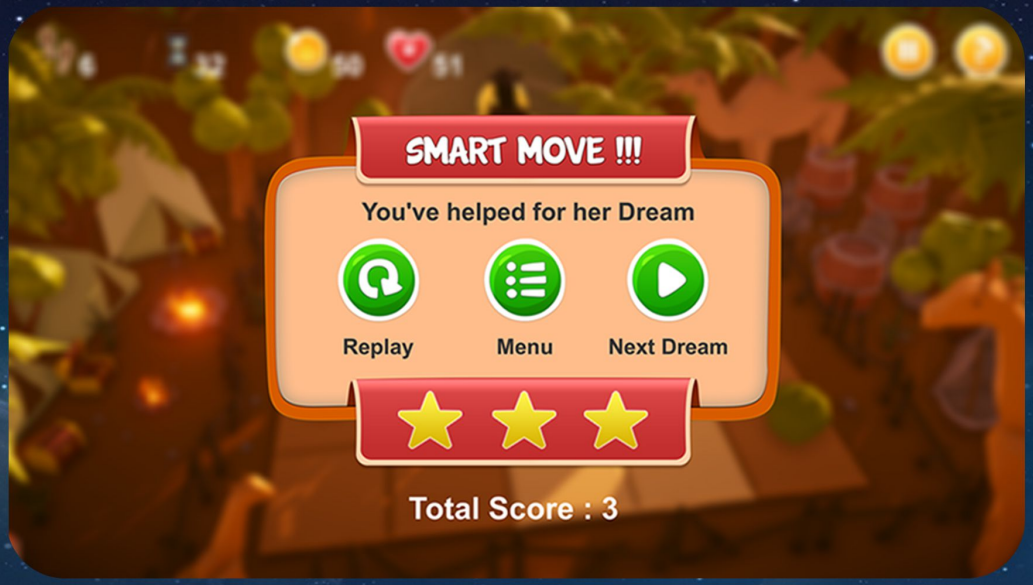

You are in Block 1
(Block Count = 1)

Destination path
(Not counted as Block Count)

Travel path
(Each block you enter counted as Block Counts)

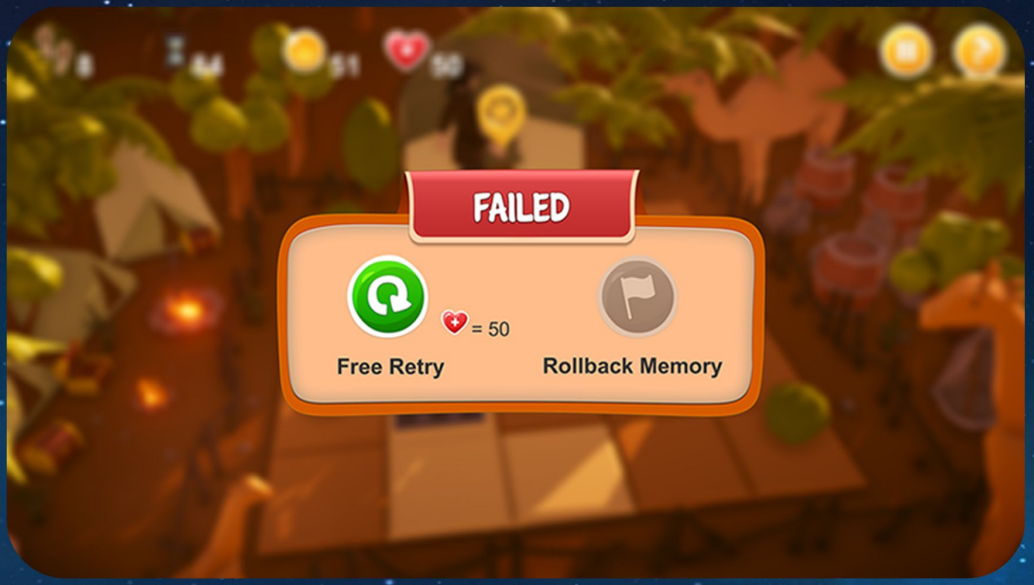

Example Page_4

If your predicted answer is correct

Yay !!! You Won 🎉🎊💥

You can move to next stage

If your predicted answer is wrong,

Ohh !!! You Lost 😓😭☹️

You will be moved to previous stage

Control Guide
