16-BIT CARTRIDGE

INTRODUCTION

Welcome to WSS'91!

Here you'll find some basic information about the game, the controls, and some useful tips and tricks.

WSS'91 is a 2D, pixel art Soccer/ Football game. It's an homage to the arcade era of sports games. A simpler time when you needed quarters to play games - but with a few twists! WSS'91 is physics-based, there are no magnetic feet. You'll have to be careful with the direction in which you are dribbling and aiming. This feature makes WSS'91 part of that (admitedly, kind of obnoxious) "easy to pick up, but hard to master" cliché.

We've also adapted arcade games to current technology. You won't have to pay for extra-credits to play with a friend. Plus, WSS'91 is playable with up to 7 other friends! What arcade lets you do that?

WSS'91 features a replay system! Replays are recorded in .gif format, so you may share them around with your friends! Try recording the goals you're the most proud of!

Remember you can share any other content you record from the game with your friends! We are happy to have players enjoy our content and showing off their skills online!

CONTROLS

TACKLE

Stop the opponent's attack with a sliding tackle!

DODGE

If opponent players are close, time your dodge to stun them!

SHOOT

Shoot on sight if you have a free path to the goal!

PASS

Pass the ball to a teammate if they are all alone!

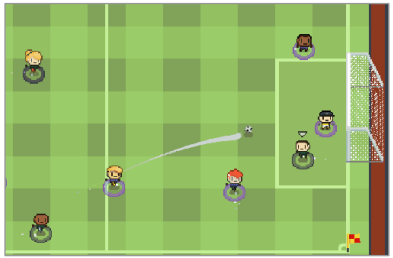

EXTRA

Bipolar Dawn is the developer behind WSS'91. You might may remember them by titles such as RogueCube… and that's actually it. This is also the first distribution project for Meteorbyte Publishing++, so we're all very excited that you are actually reading this!

One more thing: The "Locker Room" menu option allows you to unlock some of the teams in the game (including a few secret teams!). Check out our Discord server and ask about it! And if you learn of any secrets, be sure to share them around the school playground!

Well that's it. We hope you enjoy the game and hope to hear your feedback!
