TOKIWA GRAPHICS
トキワ グラフィックス

Background art is the backdrop to your story.

First you must be able to absorb a player into the game with stunning visual art.
Then you've got the audience to finish your game.
We all want to create games with satisfying art assets
but it's hard to create those assets on our own,
and it's too costly to hire a professional artist for your own project.

TOKIWA GRAPHICS are master graphic assets crafted by professional artists
that help you give your game the backdrop it deserves!

Friend or foe?

Your choice to choose.

"I want to include these monster characters in my party!"
So we heard and we created theses pixel style monsters.
You can use them as symbolic encounters if you like.
Whether you want them to be the enemy or to join the party, it's all up to you.
Let your creative ideas lead you with these graphics.

We know how sunsets should look like.

It's not just a trick of colors,
it's the beautiful aura created by the sun and the earth, light and the air.
These graphics are crafted with passion and dedication to make sure
it looks right and lets you express your true intention,
and set the scene for your story to unfold.

These monsters are crafted delicately to match to the color cordination of the background graphics.

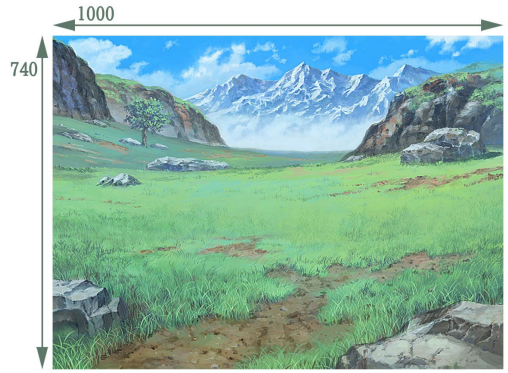

For the sunset background you can use sunset-compatible monsters.
It's a few extra steps to combine these but the graphic looks
so much better in the same color tone.
A great looking battle scene inspires you to create a special event for it.

Battle BG

Because the background is behind the characters,
we underestimate the effect of it and often compromise,
but in fact the background is playing
the leading role behind the scene.

Any game must have background,
and it captures more than a half the screen.

TOKIWA GRAPHICS Battle BG series sets a high standard
to capture the best sceneries to allow a game player to become
totally absorbed in the battle scene.
